EUROPEAN TRAVEL SUPPLE- Recreation Budget Placed at Billion

Chicago, April 36 AMERICANS will spend more than a billion dollars for rec reation during vacation period this year, according to Miles E. Westbrooke, manager of the national outdoor life exposition to be held here May 9 to 17.

Motorists and motor campers will spend half of this sum, he estimated. About 5,000,000 campers will be attracted to the highways by accelerated road building programs in all states, with a consequent revenue from tourists outstripping last year's records, he

valued at \$100,000,000 a year, he said, while tourist revenue in the Black Hills of South Dakota last year surpassed the value of the gold output of the Homestake Mine, largest gold mine in the

PENSIONS BILL IS INTRODUCED

British Measure Attacked in the House of Commons by Liberals and Labor

By Cubie from Monitor Bureau dustry, and believes that the test of LONDON, April 30 — A bill implethe operation of fair competition is menting Winston Churchill's budget announcement of pensions for "widows, orphans and persons between the ages of 65 and 70," has been introduced in the House of Commons by Neville Chamberlain, Health Minister. It applies to all subscribers to the existing national health insurance scheme, including industrial workers, agricultural labor and domestic help.

Widows lose their pensions on remarriage, but pensions to their children continue in any case until the Criticism of the budget now cen-

that the contributions it demands put an undue burden upon workers and ought to be more largely paid by the general taxpayer.

Sir Robert Horne, on the other hand, voiced the Conservative back benchers doubts whether British em-ployers can afford their share at this

me of depression.

Mrs. Eva M. Hubback publishes today a suggestion made by influen-tial women's organizations that the proposed pensions of 10s weekly for a widow and from 3s to 5s weekly for each child should be increased by excluding from benefit young childless widows who are able to work.
Upon the whole, however, the scheme has had a favorable reception-the Conservatives. claiming it has successfully "stolen

such abuse. The convention regarding these not suggested anywhere that France has intimated that it would be glad to be relieved of its obligations.

There is no hint that the French policy toward Poland is changing. One must draw one's own conclusions, but an explanation given here is that Polish finances have greatly mproved. When Poland borrowed it had a large budgetary deficit, and the Polish mark had fallen disastrously. Since then the people had consented to considerable sacrifices and the budget had been balanced, a new bank of issue founded and a new monetary unit equivalent to the gold franc called the zloty emitted.

Further, Poland has found credits in the United States for the consolidation of its debt. In these circumstances, it is impossible to continue to receive assistance from France. which is financially embarrassed, and the last 100,000,000 francs promised will remain unpaid.

Resolutions Also Adopted at Austin Convention for Rigid Dry Law Enforcement, Educational Cabinet Post, and Child Labor Amendment

AUSTIN, Tex., April 30 (Special) adopted upon the recommendation of Justice, with the Harding-Hughes in 20 states under the supervision of the Parent-Teacher Association.

Armaments by international agreeMany night schools have been orments; codification of international ganized Mrs. Jones said. law, and "some lasting organization

Reeve, national president, assured member for "some lasting organization of natiliterates. tions" was in no way an indorsement of the League of Nations as now

"No change in the Volstead Act which would readmit wine and beer, or otherwise weaken enforcement," was the text of the main prohibition resolution. Building up of prohibition enforcement by legislation making stricter granting of alcohol permits, and placing of prohibition officials under civil service, was urged.

Child Labor Resolution

In adopting a resolution for the immediate start of an intensive edutional campaign for the ratification of the national child labor amendment, the association said: "We must combat the common statement that women's organizations should not fight for legislative reform. Legislation is the high tide of civic work It is the only way of giving privileges of the few to the many."

The convention also indorsed the

giving of federal aid to the states for the promotion of physical edu-cation, as outlined in the Fess-Cap-per bill. Granting of loans by the United States Government to leading opium-

growing countries, so other crops may be planted without bringing about financial distress, was sug-gested as one means of abolishing the widespread use of narcotics.

secretary in the President's Cabinet federal aid to the states for removal of illiteracy, Americanization of foreigners, and better training of teachers are the big points of the "public school" legislative program.

Wiping Out Illiteracy A five-year program looking toward the wiping out of illiteracy in the United States was enthusiastically

An appeal to the Nation, particu the crusade against illiteracy address by Mrs. Cora Wilson Stewart, meal chairman of the Illiteracy Commis-way. sion of the National Educational As sociation and chairman of a similar ference with General von Hinden-

The fight on illiteracy in this country is primarily one to redeem the millions of men and women who cannot read or write. However, there are other purposes and objectives almost as vital to be attained by and through the illiteracy crusade. One of these is that such sentiment shall be aroused against illiteracy as will make people regard it with horror and resolve that it shall never occur again.

Community Responsibility

Another of its purposes is that every community shall be made to assume the responsibility for the emahcipation of its illiterates and emancipation of its illiterates and one that harbors a person who cannot read or write, without making every possible effort to teach him will be under indictment at the bar of public opinion for gross indifference to public welfare. Last but not least every educated citizen shall come to consider war on illiteracy his business.

The revelations of the draft during the world war shocked the Nation

the world war shocked the Natio but we are overlooking similar condi-tions today. If a registration of mothers should be ordered by the mothers should be ordered by the Government, the number who would register by cross mark would be far in excess, in my opinion, of the 700,000 young men who registered in the first draft by mark, during the war. The illiterates who are concentrated in remote localities—on Indian reservations, in Negro sections and in the foreign quarters of cities, show

FOR PEACE SEEN BY MISS RANKIN

Three Months' Tour of Nation Convinces Her That It Is People's Chief Thought

Special from Monitor Bureau CHICAGO, April 30-"We are farher along the road to peace today than we were to suffrage on the eve of our victory in that struggle," Miss Jeannette Rankin, the first woman to serve in Congress, told delegates to the national convention of the Women's International League for Peace and Freedom in session here. months on a speaking tour for the eague, traveling from the Atlantic

"Everywhere there is tremendous enthusiasm for peace," Miss Rankin English speech and procedure, the from 1910 until it was won, and I've President in a speech before a meet- worked in other causes, but I have and Central America, the United ing of industrialists and business never known anything that had the States and Canada. Some are from tribution to the common cause. enthusiastic support that the peace nations with hereditary differences movement has today. There is nothing so popular in high schools and universities as the peace question. We can find plenty of people ready to work for it; it is simply a question of organizing the forces.'

Optimism Confirmed

Miss Rankin's optimistic note was confirmed by a report of Miss Dorothy Detzer, national executive secretary of the Women's League, working at Washington headquarters.

'Anyone who has been in Washington this spring could not help but lecting accurate data on causes of the last war; the resolution of Henrik Shipstead (F. L.), Senator from Minnesota, to conclude all military con scription; the league's resolution against economic imperialsim, intro-duced in the two Houses by Edwin F. Ladd (R.), Senator from North Dakota, and Roy O. Woodruff (R.) Representative from Michigan, and President Coolidge's cut in the naval appropriations.

Replyng to the charge that there are too many peace societies, Miss Detzer continued:

"To me one of the most encourag-ing signs of the times is the sympathetic, intelligent and increasing cooperation of the large peace groups. All of the peace organizations at Washington, althought differing in policy, are in a sense like one large ments representing different func-

DRUNKEN DRIVER BILL SIGNED BY GOVERNOR

Settlement Outside Court Provided in Statute--Aids Merchants

Governor Fuller today signed the bill providing for commercial arbitration in Massachusetts. The measure. recommended in his inaugural address, has been pressed by the Governor since he took office, and provides, in his opinion, a substantial solution to a great amount of legal delay and exorbitant expense of extended industrial litigation.

of the arbitration tribunal binding upoh the parties in the dispute, once they have agreed to accept arbitra-tion in place of court trial. Arbitration has previously been permissible, but its findings were not enforceable. A more speedy administration of justice is the outcome which the Governor foresees with the operation of the new law, with the result that decisions will be more satisfactory since they can be ascertained much more quickly when the inquiry is not hampered by many technical rules of law and procedure under which the courts are forced to labor.

Similar legislation has been found successful in both New York State and New Jersey, after whose system the Massachusetts tribunal will be

Joseph Barondess, of New York, former Commissioner of Education of The new law amends existing that city, Zionist leader, and member past almost entirely in "self-selling" statutes so as to make the decisions of the commission that represented raw materials, he continued, it is American Jewry at the Peace Conference in connection with the framing of the minority rights clauses in the Treaty of Versailles, will deliver an address at a meeting Wednesday night, May 13, in the New Hebrew School, Chelsea. The meeting is called in the interests of the New England joint campaign seeking relief for the Jewish populations of Eastern and Central Europe. Announcement of his coming was made by Harry F. Smith, chairman of the

Chelsea committee.

The New England joint campaign is part of a nationally conducted effort to "reconstruct the lives of the Jewish populations of Europe saved from actual starvation by the \$63,000,000 sent them from the United States during and immediately after the World War," it was explained by BY MOTHER CHURCH Jewish Congress. Louis E. Kirstein of Boston has been named honorary chairman of the New England drive, The First Church of Christ, Samuel Kalesky, officiating as chairman. The campaign already has a free lecture on Christian Science made itself felt in cities and towns.

The markets of the Far East are destined to assume a position of foretrade, declared Halleck A. Butts, acting chief of the Far Eastern division of the Department of Commerce, at the morning session. Mr. Butts recently returned from Tokyo, where he has been stationed as commercial attaché for the past five years.

Speaking of the Japanese earthquake he said that Japan had remedied the worst effects, and its industries were being restored to a stable basis of productivity. He pointed out that the United States carried threefourths as much trade with Japan alone as it does with the whole continent of South America.

"The problems of temporary re construction have been met," he continued, "the bulk of the industrial losses have been replaced, and the general business situation is tending toward normal.'

America's Opportunity America's greatest opportunity for foreign trade development, according Court. John Barrett, former director of speakers at last night's session of the increased in different lines from 50 to 250 per cent.

Mr. Barrett advocated a Pan-Ameritwo New World continents. Canada; he said, should not be belittled as a buyer of New England products.

Frederick W. Gehle, vice-president of the Mechanics and Metals National Bank, New York, speaking on "How Can Europe Buy Our Products?" said the United States has changed its clude: Mrs. A. L. Wakefield and position from being the world's Frederick W. Woodcock, vice-presigreatest debtor nation to the greatest creditor nation and the situation is essentially one for banking to deal with. Germany, he declared, will not

of Women Voters, Dona Bertha Lutz of Brazil, vice-president for South America, accepted the challenge for the women, saying that they "will not deeper, carrying international rela-

tions into their homes."
"Just as the United States Declaration of Independence has been followed by similar pronouncements of other countries in this hemisphere," she continued, "so the advancement of women in the United States has led the way for the advancement of omen in other parts of the two continents." She urged a Pan-American lishment of Pan-American buildings in the capital cities of the various levin Swiggett. ouilding for women and the estab-

Continuance as Organization

"Let us now discuss the importance of our continuing as an organization, and let us for our help hear the experiences of women who have attained some of those things which the women of South and Central America have not yet won," declared Señora Amanada Labarca of Chile, a motion which was seconded by Señora Concha Romero James of Mexico. As a result, the discussion of education scheduled for the morning was postponed.

Prisons, juvenile courts, and how to work for suffrage were added by the women to the four-days' program which already called for discussions based on surveys which the members of the association have made in each country, four outstanding phases of the progress of women; their educational opportunities, the positions open to them in the professions, the condition under which they work, and are paid, and their status under the civil law, including their right to own property, to spend their own wages, and to be equal guardians of their children.

seven aims of the association to six of which any national auxiliary is obliged to subscribe and which were read this morning as follows:
"To promote education among all

"To raise the standard of education among women.

'To assure to married women the right or control over their own propy and wages.
'To assure to married mothers

the same rights over their own children as that of fathers.

form organizations, discussions and public conferences among vomen in order to disseminate information, and to attain for women the highest opportunity to cultivate and use the talents God has given "To assure to women the right to

MAINE BANKERS TO MEET

WISCONSIN GAS PUBLICITY RULE

(Continued from Page 1) missioner of markets, Edward A

Explaining the purpose of the pub-licity order adopted by the commission, the Attorney-General said in a recent statement:

Wisconsin is making a test of how far the gasoline business can be trusted to regulate itself where the State aids in bringing about complete publicity of all prices charged for gasoline. Under the operation of the order of Mr. Nordman, it will be possible to know whether competi-tion under circumstances of fair play and reasonable inducement can

play and reasonable inducement can be relied upon to consider the public interests along with its own. The period of the highest con-sumption in gasoline is just con-ing on. Trade journals and the government figures indicate that stocks on hand, while somewhat less than a year ago in proportion to consumpion, are in excess of requirements judged by the average stocks and consumption during the last 10 years. The trade journals indicate an appreciation of the fact that the present retail price of gasoline is too high, judged by the margins between the retail prices charged in Wiscon-sin and the spot gasoline price in the mid-continent field.

Fair Returns Agreed On This fact is emphasized by recent

rice cuts in Chicago and South Dakota, both of which are within the Standard Oil territory of which Wis-consin is a part. It is further emphasized by cuts in prices in other localities, particularly on the Atlan-

tic seaboard.

Trade journals give as a reason for the reduced Chicago price the local competition, and as a reason for the South Dakota reduction the new law in South Dakota which authorizes the governor, attorney-general and State treasurer to di-rect the State highway commission to sell gasoline to the public when retail prices are unreasonable and excessive, such sales to be made for only and without loss to the . Any city in Wisconsin already has this power.

The new order merely compels the fullest publicity with regard to the prices charged for gasoline by all engaged in the business. It is only a step in dealing with the problem.

HILLSIDE SCHOOL WINS D. A. R. INDORSEMENT

Provides Home Surroundings for Worthy Boys

Hillside School, a farm home and school at Greenwich, Mass., for worthy boys who need financial aid, has been "fully indorsed" by the National Congress of the Daughters of the American Revolution, meeting last week in Washington, D. C., according to information received by Franklin P. Shumway of Boston, the school's president.

The school was started 18 years ago by two sisters, Miss Charlotte V. Drinkwater and Mrs. Mary E. Warren, to provide a farm home and common school education for children whose parents or friends are unable to give them the comforts and surroundings of home. It is not a "reform" school. Neither is it an "insti-

In a letter to Mr. Shumway from Channing H. Cox, then Governor of Massachusetts, dated Dec. 26, 1924, Mr. Cox said: "The mere fact that and self-respecting men, and that many of them are already successful business men, is a very great credit to the men who have given so largely of their time and money to make this

TO EXPLAIN SHIP BUSINESS Birmingham, Eng. (P)—In West Rromwich, a suburb of Birmingham, the Town Council has decided that only people with incomes of less than \$1500 may rent any of the houses owned by the municipality. Complaints have been made that most of the houses are rented to people who own motor cars and, therefore, it is reasoned, can afford to build their own homes. The Bromwich council has built 4200 houses to eight rooms, which rent for Massachusetts Institute of Tech-

"Abolish the Cross Mark" Every educated person owes it to his country to measure back to the less fortunate some of the advantages he has enjoyed and every educator should be something of an evangelist, preaching the crusade

against ignorance.

The cross mark is today being written on court records, marriage licenses, jury records, deeds and mortgages—chiefly mortgages. This sort of signature, so widely used in the United States, is a relic of the dark ages. It belongs back with the musket, the tomahawk, the bow and arrow, the shot pouch, powder horn, the Dutch oven and the pewter plates and not in this age at all. Those who do not read and write are not living in the present age but

one of the past.
Many communities and an of individuals have accepted the responsibility for wiping out illiteracy—but there are still apathetic people and still some communities to be found where the only way that a grown man may have educational advantages is to join the army or go to the penetentiary. Both of these provide schools for adults. The public school has never served

in its fullest capacity—nor will it until it opens its doors at night to the illiterate and near-illiterate citi-zens. Evening schools and home instruction will one day be as much a part of the public school system as the day school is now, and then the school will deserve its name of publie school.

Democracy Not "My Rights" Dr. Henry Neumann, leader of the Brooklyn Society of Ethical Culture,

in terms of "my rights." But there is something else. The finest citizens are those persons who shoulder willingly their fun share of the responsibilities of the groups in which they live. Once we grasp this fact, we see that there is no better place than the home where citizenship of his better kind can be begun. Ever home has certain tasks which will be done better when every member takes a full part in them. To carry one's share honorably in these collective duties, requires a

WOOLEN MILL'S TAX REFUNDED

Supreme Court Renders Decision Concerning Business Losses Since 1920

The Charlton Woolen Mills, of Charlton, Mass., have won a tax rebate of \$1,382.62 from the Common-wealth by a decision of the Supreme

The decision is believed to be farreaching and important in industry as it establishes that business losses which have occurred since 1920 are deductible in tax computation.
In April of 1923 the Charlton

Woolen Company, in filing its excise tax return, deducted from its gross ncome \$64,026.21 as a net loss. September of 1923. Henry F. Long. the tax commissioner, made demand upon the company for a tax of \$2,-616.01, disallowing the deduction. The petition of the company to the Supreme Court stated, in conclusion, "that the commissioner rejected in an integrant said abatement claim, and said system contentions of your petitioner, and erous other peace-time capacities. has exacted and now refuses to abate

Big Field of Progress an excise tax assessed at the rate of 21/2 per cent on an income computed without the benefit of the net loss deduction, as aforesaid, and amount-

ing to the sum of \$1,382.62." whether or not the petitioner, having suffered this net loss in 1921, legislation as a deduction in its re-

as follows: "If for any taxable year beginning after Dec. 31, 1920, it appears, upon the production of evidence satisfactory to the commissioner, that any tax payer has suffered a net loss, the amount thereof shall be deducted from the net income of the tax payer the succeeding taxable year; and if such net vicinity. There are among them lamps, bronzes, alabaster vases. A loss is in excess of the net income for such succeeding taxable year, the amount of such excess shall be allowed as a deduction in computing has been developing for 30 or more the net income for the next succeeding taxable year."

After quoting provisions in Chapter 232, the court concludes, "We find act which seems to be in conflict with the ordinary meaning of these provisions. The Legislature having kept in mind. Among them are, for traction of Greek art, for example, tax computed with the allowance of paper treatment of what aviation has such deductions.

and interest is to be entered. as "friends of the court.

On Architectural Rendering

the tragedies—and comedies—experienced in architectural rendering. An outstanding tragedy in y own experience was my affair ith the Bush Building in New York. en watching this tower arise from the ground with the interest which was felt by the entire city.

I got up one morning feeling that I had comprehended its nature, and had comprehended its nature, and went down to Forty-Second Street, with a little pad of paper, satisfied that I could snare that form in half an hour at the outside. My first difficulty was in getting just the right point of view. I first took up a position across Forty-Second Street; by looking directly ahead, and holding my pad in a normal (and discreet) position, I was able to lay in the lower stories acceptably. As my eye traveled upward, the head went back, the pad came up, and before I reached the apex, I was kneeling over at an angle which attracted the attention

of a traffic officer.

When I had retired, recovered, and examined my sketch, I found that it possessed considerable character—in fact, several characters. The base was there all right—so was the top; but somehow, there was no particular relation between them. Though I had correctly delineated all the parts, I had somehow failed to conceive the whole. I next went to the roof of a building six blocks away; this was considerably easier: I was able to see the whole thing at once. I drew what the whole thing at once. I drew what I saw; somehow, the result lacked character. I had the silhouette all right but there was nothing particular inside of it. Though I had pains-takingly drawn the outline, I had somehow failed to make any suggestion of essential mass. I will not bore you with a recital of the other points of view which I tried. At one point in my quest for the truth, I leaned my confused head against the building itself and looked up; I got on top of the thing and looked down.

I was beginning to sense some elusiveness, some coquetry in buildings. Eventually the sun set. Of urse I got up with it the next morning.... To make a long story short, I have not finished that sketch yet—and I am convinced that there are profound questions as to how buildings really look and act.

sonally, and as I had admired his practice for many years, I went with feelings of most pleasurable anticipation. The design which he showed me was a magnificent mass. It was a pleasure to imagine how it would look, after completion, surrounded by the light and air of actuality. The architect explained, that the proposed drawing was going to her composed of a composed of a composed drawing was going to her composed of a composed of a composed drawing was going to her composed of a composed drawing was going to her composed of a compos should be made to look this particular surrounding blocks by the smiled (so did I). I realized the time this project materializes. I ings should be made to look this particular

How Towers Grow on Paper

An architect calls us in to outline his preliminary conception of, say, a 500-foot tower. The moment his pencil touches his paper, we realize that he is in a distinctly debonnair mood. By the time his pencil has gone half way up the paper the abandon increases and he lets fall the suggestion that we really should not let ourselves be tied down by the let ourselves be tied down by the mere numeral 500. By the time his pencil has reached the top of the tower (or the paper) this designer, no-completely intoxicated, has practically demanded that we draw a

tower 1000 feet high! I once rendered, for one of the most conservative members of the profession, an office building whose plan depended upon the essential of a large interior court. In making our preliminary perspective, however, we did not let a mere large interior court phase us in the slightest: we put on top of that building a pyramid which, more solid than those of Egypt, rested squarely upon the tain carefree attitude characterizes all our work: we are free to draw the splendid mass of the American Radiator Building and we don't have to put the gold in the drawing unless

we really want to. If I were asked to mention what I regarded as the most important ecompense for our efforts, I would refer to a remark made, I think, by du Maurier in his novel, "Trilby." He said: "You can't really comprehend a face until you have drawn it." This

Berlin, April 7 other conclusions, as a composer of the young generation who aims first of all at self-expression. formances of the same master works can lead to a complete change of the substance of these works. That a sonatina by Philipp Jarnach, question answered. One of the most welcome parts of my daily program is when some of the youngest members of the profession drop into my performing artists, and that it deperson the profession drop into my pends on the talents, on the mood long and masterly built piece of classicist, walking down the avenue, drafting room, as they occasionally arm-in-arm with his chum, Mr. B. do, after hours. If they are in the of the Gothic Age. The next day we mood for it, they state just what people who are very far from feeling what the composer felt when writing his composition, is a fact the influence of which on the life of art cannot be overrated. It may be said substance. Without neglecting what is modern, he never clings to rules that the art of the executant, when driven past a certain point, damages the act of production itself. Both hearers and performers begin to for-get that they are only mediums for high extent. He is himself a player the creative impulse of the com-

These considerations are of particular importance in the case of Beethoven, because no other composer has nearly the same number of performances to his credit during the past century as this master. Recent Beethoven performances by Wilhelm Furtwängler and by Felix Weingartner afforded a welcome opportunity of comparing the style of interpretation of two conductors, one of whom belongs to the past generation, while the other seems to express the feel-

ing of our age.

Now it is very strange that Weingartner apparently scores more suc-cess in England than in Germany, whereas Furtwängler is not generally accepted by the English public. It quite certain that Weingartner gives a much more fluent Beethoven than Furtwängler. The latter, being a child of our age and having grown up during the Great War, is, of course, much more ecstatic, both in gesture and in style, than Weingartner, who has become, at the conductor's desk, a perfect gentleman, rather sparing in external movement. And his Beethoven is gentlemanly, too, full of has found many successors. Baer-grace, never exceeding the limits of wald is nearer Busoni, whom he did good taste.

MISSOURI VALLET CONFERENCE BASEBALL STANDING

CHICAGO, April 30—In four games abroad and at home University of Nebraska has a chance to advance during the next seven days in the baseball title race of the Missouri Valley Conference. Having a balanced record of two games won and two lost, the Combustory most two two tames.

Performing with a little better than average ability at the bat, the Nebraska team should bother the Kanaverage ability at the bat, the Nebraska team should bother the Kansas State and Iowa State pitchers. In 137 times at bat so far they have delivered 35 hits for an average of 255. The attack is led by M. G. Volyz '26, first baseman, who delivered seven hits for an average of 438 in his first four games. Some of them were for extra bases. This shows a notable improvement for Volz over his record of last year. If he sustains this form he may lead the team in place of R. K. Janda '25, second baseman, who was runnerup for Conference batting honors last season. Janda has not done so well to date, averaging only 222.

Despite its power at the bat, Nebraska is not scoring heavily, showing the need of better organization in the attack. The Cornhuskers turned seven hits and five errors into a 3-to-1 victory over Washington the other day, but lost the next day, 7 to 3.

victory over Washington the other day, but lost the next day, 7 to 3. but lost the next day, 7 to 3, gh gathering 10 hits. They will though gathering 10 hits. They have to tighten up on this record. Karns' Average .500

At Kansas State the Nebraskans en-counter a team which has won three and lost only one game. Coach C. W. Corsaut's Aggie victories include one over Oklahoma, which had won five body and as an incentive plan to donate a cup yearly to the player acclaimed most valuable to the varsity player, which kept the Sooner hitting scattered and blanked them, 3 to 0. Joseph Greer '25 pitched the losing game the day before with the Sooners collecting 5 to 1, on 8 hits. Capt. R. M. Karns '27. Aggie shortstop, batted for 500 in eight times at bat in these games and should prove a problem to the Nebraska boxmen. Corsaut's Aggie victories include one

FISHER OFFERS TO BUILD TEN BOATS

Will Take Part in Gold Cup Regatta in August

NEW YORK, April 30—A meeting of the New York Gold Cup Committee was held last night at the Hotel Belmont, and President F. R. Still of the American Power Boat Association. Who presided, announced that Carl Fisher had offered to build 10 one-design runabouts to take part in the Gold Cup Regatta and to be driven by amateur speedboat drivers of the metropolitan district. Fisher, who is a motorboat racing enthusiast, informed President Still that these boats would be similar to a class he built for the Miami Spring regatta and which were driven by professional automobile racing drivers. They were about 20 feet long on the waterline and were equipped with 100-horse-power engines.

It was announced that the Indian The former Syracuse star is work to straight into opposing defensemen on the spring trip.

and were equipped with 100-norsepower engines.

It was announced that the Indian
Harbor Yacht Club had challenged for
the Gold Cup in the name of G. M.
Townsend and that five cities outside
of New York, had filed challenges for
the trophy that will be raced for on
Manhasset Bay, Aug. 29. These cities
are Philadelphia, Detroit, Buffalo, Miami and Tampa. There are already
ami and Tampa. There are already Townsend and that five cities outside of New York, had filed challenges for the trophy that will be raced for on Manhasset Bay, Aug. 29. These cities are Philadelphia, Detroit, Buffalo, Minami and Tampa. There are already 20 entries in the 151-hydroplane race, which is to be held on Aug. 29, and a challenge has been received from a New York yachtsman for the International One-Mile Trophy, which is held by G. A. R. Wood of Detroit, and will be defended by him.

President Still told the members of the committee at the meeting that

the committee at the meeting that plans for the big speedboat carnival of next August were going along well and that the contests for the Gold Cup and the Dodge Trophy, as well as other feature events to be decided, were expected to draw big entry lists.

Coach Lydecker Is Making Progress

Former Syracuse Lacrosse Star
Is Doing Much for That

There were only two games played in the National League yesterday, but both are quite significant. The Giants lost and the Braves won.

ley Conference. Having a balanced record of two games won and two lost, the Cornhuskers meet two teams which claim places above it on the ladder. On Friday and Saturday, Coach W. G. Kline takes his nine to Wanhattan, Kan. 10 play Kansas State Agricultural College, and then goes home to receive at Lincoln on Monday and Tuesday the Iowa State College nine.

University of Missouri and Washington University engage in a fourgame series with Missouri appearing at St. Louis on Friday and Saturday and then entertaining Washington at Columbia on the first two days of next week.

Has Power at Bat

Brown already undertaking the sport and Springfield seriously considering it for next year, Coach Lydecker is work-ing up future Harvard lacrosse teams

Coach Lydecker is well liked at Harvard and has created a distinct and favorable impression and conse-quently is receiving much backing from among graduate lacrosse play-ers who still entertain hopes that Harvard will again rise to the fore in the famous Indian sport. It is reported that certain graduates hope to in-crease interest among the student

Forgetting divisionals for the present the Crimson strongest lineup now would probably read as follows: ih, Albert Norris '25; oh, W. A. Morrison '25; 1st a. G. B. Salter '26; 2nd a. C. W. Gillies '26; 3rd a. Joseph Sullivan '25; c. Albert Rubin '26; 3rd d. C. O. Simpson '27; 2nd d. Capt. A. E. Reed '26; 1st d. M. W. Linn '26; cp. Alexander Levin '25; p. J. H. Watson '26; g. H. L. Fans would not be american League. Fans

trip to England, is rebuilding Harvard's one-time prowess in the sport from the foundation up. Despite its withdrawal from the United States intercollegiate Lacrosse League, Harvard has acquired the services of Lydecker to bring the teams up to old-time standard.

Before many seasons pass New England may have a branch lacrosse league of the U. S. I. L. With upward of four teams. Little is known of the sport through this section; but the colleges and universities are finding it valuable and desirable to the student body. Coach Lydecker named The report now is that G. H. Ruth of New York may be out of the game until the middle of June. The Yankees are greatly in need of the hitter as a look at the standing will prove.

greatly in seed of the intert as a loss as the standing will prove.

A major league record if not a college record was tied, yesterday, by St. John's Preparatory School against Mt. St. Charles. St. Johns won 14 to 1, the winners making only one assist. Pitcher O'Connor struck out 17 players. Only one team in the major leagues ever went a full nine innings with only one assist in the field, this being credited to the Chicago White Sox against Boston in 1917. Therefore the incident is noieworthy.

W. E. Lindberg, captain and pitcher of the Washington and Lee baseball team, has been signed by the New York Glants it is announced. He will report to the Giants, June 3, 1925. In five starts this season with his college, Lindberg pitched the team to five victories against five of the strongest college teams in the east.

Footballers Not

some and should prove a problem to the Nebraska boxmen.

Nothing less than a split is expected by the title-defending Iowa State nine on Monday and Tuesday. Coach W. S. Chandler's nine won its first game, 6 to 3 from University of Kansas this week, and the second was postponed by rain. Faulty fielding by the Jayshawkers was partly responsible for Ames' victory, while C. M. Berray '27 claimed pitching honors with 13 strikeouts, allowing only 5 hits. After that performance. Berray is almost certain to be one of the pitchers against Nebraska.

Washington will need better hitting against Missouri. Coach J. E. Davis' players collected only 11 in 65 opportunities against Nebraska, with B. C. Cheatham '27, second baseman, gathering three of them. He hit a home run in the second game, while a timely triple by J. E. Gragg' 25, was the deciding factor in the 7-to-3 we for the run of the trip. The same men making the trip, The same men making the trip, The same men making the trip, The same men making the trip. CHICAGO, April 30—Football players at University of Chicago who are now playing baseball are not candidates for the trin to Japan which dates for the trip to Japan which the diamond nine is to make in the fall, it is announced here by Prof. A. A. hopes. The fact that he believes the diamond nine is to make in the fall, it is announced here by Prof. A. A. Stagg, athletic director, following the action of the Board of Physical Culture and Athletics in granting permisture and Athletics in granting permistion for the journey. This decision sion for the journey. This decision are not increased its power to a much sign for the property degree than last year, the sion for the journey. This decision has not increased its power to a much bars chiefly W. E. Marks '27, star pitcher, who is expected to be one of the leading halfbacks on the gridiren squad. It also excludes E. C. Duvail van Gregg, one of the star pitchers of the Pacific Coast League last year, is with Washington. His case is no-

With the team leaving for the Orient in September'and around about Christman, several players now on the freshman team may be eligible for the trip. One of these is G. M. Lott '26, one of the first 10 ranking tennis stars of the United States, who also is a baseball pitcher of outstanding ability. This will be the fourth trip made by Maroon baseball teams to Japan. Others went in 1910, 1915 and 1920.

If Lott goes with the team, it is said, he probably will play tennis in Igapan also. Members of the former baseball teams have engaged in track and field athletics, gymnastics, wrest, and of field athletics, gymnastics, wrest, and of the conclusion that president Coast League last year, is with Washington. His case is nothing short of extraordinary, as he is making his third return to the big making his third return to the big wastern to the big saw. His showing with Seattle last year led President C. C. Griffith to add him to the club's roster, Stantonals outhit the hard-hitting New York Glants, here, yesterday, and with the hard-hitting New York Glants, here, yesterday, and the league leaders, 13 to 3. Both W. O. Doan of the Glants and Dana Filligim of the winners were knocked out of the big wor heir second straight game against the league leaders, 13 to 3. Both W. O. Doan of the Glants and Dana Filligim of the winners were knocked out of the big with the league leaders, 13 to 3. Both W. O. Doan of the Glants and Dana Filligim of the winners were knocked out of the big was not be resulted and W. H. Reuther, from Brooklyn, are also new additions to the league leaders, 13 to 3. Both W. O. Provided the president C. C. Griffith the league leaders, 13 to 3. Both W. O. Doan of the Glants and Dana Filligim of the winners were knocked out of the big was not be resulted to 3. L. Kelly of the loasers of the pitchers, and the fact the provided the provided the provided the provided the provided the pitchers and the league leaders, 13 to 3. Both W. O. Provided the provided the provided the provided the provided the provided haseball teams have engaged in track all his efforts on winning another penand field athletics, gymnastics, wrest-ling and other sports on the side when years look out for themselves. With veterans in the pitching box and youth in the field, Washington should be to say the least, a steady club. One department reacts on the other.

Enthusiasm Remains "The team has all the enthusiasm it had last season," said Manager Harris. The games with the Glants, before the season opened, enabled the club to hit its stride immediately on entering the regular season and we did not get off to a slow start as is generally the case with a pennant-winning club of a preceding year. Reuther and Gregg both look good to me and Fred Mar-berry is considered one of the best relief pitchers in the league.'

of pitchers in the league."

When considering the chances of the Brooklyn is the only department that has been changed in any way, and that has only been added to. The outfield, infield. and catching are all taken care of by the same capable mer who played last season. The only weak spot in the Washington team is its reserves. According to T. R. Cobb of Detroit. A ceam is no stronger than its reserves, and if this holds true in the case of Washington, it puts a new angle on the outlook.

DETROIT Mich. April 30 (Special)—T. S. Denton, representing Kansas City in the National Championship Three-Cushion Billiard League, won the aftermoon game at Recreation Theater, here, from G. L. Couplos of Detroit, 50 to 29 in 54 in 165 in 16

A team may go through a season without having a regular out of the game, and Washington had little trouble last year, and may not experience any difficulty this season without having a regular out of the game, and Washington had little trouble last year, and may not experience any difficulty this season that way. However, a few more dependable men in the reserve list would make the Senators more certain of another victory in the league race.

Brilliant Outfield

Brilliant Outfield The games played thus far in Bos-

ton by Washington have convinced the Boston fans that the Senators are going to be a strong pennant con-tender. The work of the outfielders, Leon Goslin and E. C. Rice has been nost impressive both from a hitting and fielding standpoint. Harold Ruel still holds his position as one of the best of catchers according to the fans in Boston, judging from his exhibitions at Fenway Park, and the dash and enthusiasm of the infield is also a point for commendation.

Baseball strategy appears

Baseball strategy appears to be a component part of the Washington program this season. It is apparent that Manager S. R. Harris and President Manager dent C. C. Griffith have got together at some time or other and devised a system which, although calling for daring baserunning, should, if conducted rightly, add to the run-scoring ability of the Washington team. Originally inality appears to be a characteristic of Manager Harris, and fans may ex-pect to see a number of new and in-teresting plays which are distinctly Washington this year.

National Junior Champion Defends 18.2 Billiard Title, 1200 to 684

NEW YORK, April 30 Kamakichi Suzuki had little trouble in retaining his National Junior 18.2 Balkline Büllard Championship from the challenge of Tadao Suganuma when the match cam to an end here yesterday. In the final block of the 1200-point match, he scored 400 points to 86 for the challenger. This gave him to the challenger.

can to an end here yesterday. In the final block of the 1200-point match, he scored 400 points to 86 for the challenger. This gave him a total of 1200 to 684 for the younger player.

Resuming the run by which he had completed his string on Tuesday when he had made 36, the titleholder ran 75 more points before relinquishing play in the twenty-seventh inning of the match. Suganuma made one, but followed in his second liming with a run of 54 in his most skillful style. He was not able to maintain the pace, however, and Suzuki settled the match when he made successive runs of 86 at the table. He ran out his string in the eleventh inning, making a total of 37 innings for the match, a most at the table. He ran out his string in the eleventh inning, making a total of 37 innings for the match, a most commendable performance, showing that he is well superior to the other players in the junior championship ranks. His grand average was over 32, the best that has been shown in the event. The score by innings: Kamakichi Suguki 75 44 5 0 4 50 8 4 74 2 18 400. Grand total 1200 ve. 36,4-11. Grand average 32 16-37 ligh run 88.

NURMI BREAKS THREE RECORDS

Plant and Myyra Also Make New Marks at Los Angeles Games

LOS ANGELES, April 30—Paavo Nurmi in a mile and a half run here last night against Lloyd Hahn. Boston A. A. star, broke three world's records—two of which had stood for nearly 30 years, the other almost 20 years. He broke the tape 50 yards ahead of his competitor. The new marks were for 1½ miles, 1¼ miles and 2000 yards.

All of the pilots and aides, with the exception of H. V. Thaden, who will pilot the Detroit, are here. Thaden will arrive today, will arrive today.

William Plant, United States wars ing champion, and John Myyra, Olympic javelin, champion, shared honors with Nurmi. Plant defeated Frank will arrive today. Smouse, Los Angeles, in a 2500-meter walk and broke another world's record

CLEVELAND, O., April 30-High scores, which produced new leaders in the singles and doubles events, and set a new game record for the tournament marked yesterday's activities in the annual tournament of the Woman's National Bowling Association.

Misses M. Baker, and M. Eberl of Chicago, went into first place in the doubles with a 1119 score, and Miss E. Reich, Chicago, with 622 took the lead in the singles. By toppling the plns for 258 in her first game, Miss Reich broke the game record of 224 established by Mrs. Mostevens, Chicago, yesterday. Miss Reich had 202 and 162 in her other games.

Miss A. Higgins, Chicago, rolled into second position in the singles with a score of 597; Mrs. K. Nelson, Chicago, took third place with 568, while a 514 by Miss F. Harrity, Chicago, gave her a tie with Rose Tess of Chicago for fifth place.

Crashing the pips for 1008, Misses

THURNBLAD WINS TWO THURNBLAD WINS TWO MILWAUKEE. Wis., April 20 (Special)—Both games were taken by A. J. Thurnblad of this city from A. H. Kieckheifer of Chicago, here, yesterday, in the title race of the National Championship Three-Cushion Billiard League. Thurnblad required 36 innings for the first, 50 to 32, and 52 innings for the second, 50 to 48, scoring high runs of 5 and 7 against 7 and 6 for Kieckhefer.

What effect will the choice of Field Marshal von Hindenburg for President of Germany have upon that country's relations with other nations?

What effect will it have upon its efforts to obtain credits How do you account for a republican country choosing as its chief executive a candidate who is avowedly monarchist?

What factors determined the election? (See Monitors of April 25, 27, 28 and 29.) What measure of utility and beauty is the new monu-

mental architecture like that of large American cities adding to the development of civilization?

Is the magnificent aspect of today's New York skyline a partial compensation for the increasing darkness of the streets of that city in the daytime and the need of constant artificial illumination of the interiors of tall structures?

In what respect is a certain European authority on civic im-provement justified in calling the American towers of commerce social and economic mistakes?

What effect will the intense concentration of day-workers in the large cities, made possible by lofty buildings of great capacity, occupying comparatively small sites, have upon the improvement of railway transportation, enabling these workers in the not distant future to dwell in the country far from the cities, and yet spend only an hour a day in getting to and from the office? (See Monitors of April 16, 21, 22, 23, 24 and 25.)

Two questions, based on matters of public interest recently printed in The Christian Science Monitor, are to be asked regularly in the above form on the Thursday Educational Page. The purpose of these questions will be as follows: To assist in a more thoughtful reading of the Monitor on the part of all its readers. To present one question adapted to use as a problem-project by the upper elementary grades. To present one adapted to use by secondary schools and colleges.

World's Fair Exhibit in Schools

St. Louis, Mo.

When Carl G. Rathmann, assistant superintendent of St.

Louis public schools, visited the fur of stuffed animals and the varicolored feathers of birds found in Japan. The stuffed or preserved the world's Fair here in 1904, he is seenes or factory pictures and this is supplemented with stereoscopic and lantern slide views. They feel the fur of stuffed animals and the varicolored feathers of birds found in Japan. The stuffed or preserved in Japan. The stuffed or preserved the fur of stuffed or preserved in Japan. English House on Campus of University of Wisconsin

Madison, Wis. Special Correspondence
University of Wisconsin, rich in the variety of living quarters offered to its students. this semester opened Arden House as the home of English major students desiring to reside there. Besides the orthodox dormitories, rooming houses, co-operative houses, fraternity and sonority houses, Wisconsin supports two journalism houses, one for men and one for vomen, a French house, a German house (reopened this year for the first time since the World War), and now the English house.

It is fitting that the house used for the purpose is the one owned by Dr. Karl Young, now of Yale, but until last year for many years head of the English department at the University of Wisconsin. About a dozen girls live in the house with laperon, and the place is the rendezvous for all English majors and minors on the campus, as well as of the faculty in the department of English and those on the campus who are interested in literature. Besides those who live at the club, and those who drop in casually from time to time, between 20 and 30 and women take their meals at Arden House.

CONFLICTING MOVEMENTS IN STOCK MARKET

Heavy Offerings of Dodge Preference — Some Strong Spots

ing of today's New York stock market, which failed to reveal a clearly defined trend. United States Steel opened fractionally higher, and Max-well B moved up 2 points.

Public utilities were in brisk denand, Utah Securities jumping 31/2 oints, and American Water Works a Oil and Sugar shares were

Public utility shares continued to display conspicuous strength, but bullish operations elsewhere were confined to a few special issues.

Utah Securities extended its initial gain to 5 points, and Columbia Gas and American & Foreign Power joined in the upswing.

in the upswing.

Dodge Brothers preference stock, which will soon sell ex its bonus of class "A" shares, broke below 100 for the first time, dropping as low as 98½ under heavy offerings. Its weakness checked an early advance in other protections.

other motor issues.

Steel shares turned reactionary,
United States Steel falling a point below its opening price, and Republic
declining more than a point to its 1925

low level.

Norfolk & Southern advanced 2½
points on reported accumulation by
other rail interests. Foreign exchanges opened steady, terling hovering slightly above \$4.84.

Selling Becomes General

With an uncertain business outlook overhanging various industries and renewal rates, and call money marked up to 4 per cent, selling later became more general, with several stocks yielding readily to the pressure of liquidation, Brunswick Balke-Collender was hammered down 3½ points to 32%, a new low for the year, and Republic Steel sold at a 1925 low record at 42. A sharp break of 7 points of United States Cast Iron Pipe intensified the market's unsettlement.

The forenoon trading developed several independent points of strength, however. Southern Railway rose to a record high level of 92% in anticipation of an early dividend increase, and Sears Roebuck jumped six points on reports of a prospective capital readjustment. Sustained buying of public utility shares was noted, and a moderate improvement took place in motor and tire stocks.

Round amounts of American Woolen Equipment and steel shares were thrown on the market in the afternoon, driving down United States Steel to 112%. United States Cast Iron Pipe extended its drop to 10 points, while Commercial Solvents A lost 8, and the B stock 5 points.

This selling, however, failed to halt the upward trend of many of the public utility shares, Utah Securities getting up 10½ points to 102. Effective buying was also noted in New York Central, Maxwell Motor B and Southern Railway, the latter climbing to 93½. Selling Becomes General

Bond Market Unsettled

Cross currents of trading unsettled the bond market in today's dealings, and prices pursued an irregular course. Withdrawal of syndicate support for the new Dodge Brothers bonds was followed by a break of 2½ points to a low record at 96% compared with an original offering price of 99. Later recovery carried the quotation back to 97%.

97%.
Magna Copper 7s lost 1% points.
Mixed movements prevailed in the railroad group, the heaviness of New York Central and New Haven issues contrasting with moderate advances in

test of a bank's strength is 1 the ratio of capital, surplus and undivided profits to deposits, and not the size of its deposits.

The comparatively high ratio maintained by the American Trust Company, together with its conservative management, insures ample protection to its customers.

HUDSON MOTOR EARNINGS BIG

Record Profits Are Anticipated as High Production Continues

The Hudson Motor Car Company's are expected to average around \$2, 000,000 monthly, which indicates a balance for the period ended May 31 of about \$6,000,000 or \$4.50 a share for

1,320,200 shares.

During the first quarter ended Feb.
28, net was \$3,826,000. This is equal
to \$2.90 a share, notwithstanding that 13% 1,320,200 shares.
During the first quarter ended Feb.
14% 28, net was \$3,826,000. This is equal to \$2,90 a share, notwithstanding that the production averaged approximately 15% 18,000 cars a month.
This average was maintained in March, and beginning April 1 output was advanced to 1050 cars a day which indicates shipments this month approaching 25,000.
The property of the production con-

proaching 25,000.

If the present high production continues in May it is likely that output for the first six months of the fiscal year will exceed 60,000 cars, contrasted with 44,297 in the first quarter.

While an estimate of \$10,000,000 net in the first six months may sound high, the record showing in the first quarter gives it some weight. Such a balance would compare with net in the entire fiscal year ended Nov. 30, 1924, of \$8,073,458 which was equal to \$6.10 a share.

Last year 128,000 cars were shipped and reported net profits equaled \$63 a car. In October a sweeping reduction in prices was made, amounting to \$100 on Hundson coaches and \$55 on Essex

on Hundson coaches and \$55 on Essex coaches.

The following month a further reduction of \$50 a car was announced on both models. The result was to concentrate sales on the coach model, greatly increasing output as shown in the first three months' report when 44,287 cars were shipped, at an annual the first coach model, and the first coach was the first care. rate of more than 175,000 cars.
Economies resulting from this gain in production are reflected in increased net profits for the three months which amounted to \$86 a unit

months which amounted to \$86 a unit despite price reductions averaging from \$100 to \$150.

The peak reached in the first fiscal quarter was 750 cars a day. It has since been increased 40 per cent. Whether this high rate can be continued the next 45 days is still a question, but a conservative figure for the first six months' net places it at \$8,000,000, or the total earned the 12 months ended Nov. 30.

10% over the corresponding period in 1924.

Net current assets on March 31, 1925, are approximately \$5,900,000, compared with \$5,150,000 on the like date a year ago. Orders and shipments for April are expected to be larger than for any month since October, last, which was one of the big months of the year. ATL., BIRMINGHAM & ATLANTIC
Atlanta, Birmingham & Atlantic for
the year ended Dec. 31, 1924, report a
deficit of \$244,901 after taxes and
tharges, compared with deficit of \$396,752 in 1923.

New York Dock Company for the year
ended Dec. 31, 1924, shows net of \$554.2031 after depreciation, taxes and interest charges, equivalent after preferred dividends to 77 cents a share on
charges, compared with deficit of \$396,752 in 1923.

Earnings of Railroads in South Show Biggest Increases

The outstanding feature of railroad statements for March and the first quarter of 1925 is the big gain in gross.

quarter of 1925 is the big gain in gross, and net earnings shown by southern carriers, both east and west...

Southern Railway, Seaboard Air Line and the Walters roads furnished the most striking performances. The first-named, with another good month in March, brought its net earnings for the quarter up to \$7,300,380, representing a 20.5 per cent increase over the first three months of 1924.

This was in spite of the fact that gross earnings of Southern in the period increased only \$1,590,000, or 1.6 per cent, indicating that increased net was due largely to continued improvement in operating efficiency and

ment in operating efficiency and

Seaboard's excellent showing directly reflects the prosperity of Florida, and, more particularly, the unexpected volume of traffic handled on its new cross-

Atlantic Coast Line and Louisville & Nashville each showed substantial increases in net in March and the three months, improvement in each case being largely due to savings in operating expenses. Missouri-Pacific, 'Frisco and Missouri-Kansas-Texas, southwestern Missouri-Kansas-Texas, southwestern carriers, all showed increased gross and net for March and for the quarter.

With a few exceptions, northern, eastern and western carriers suffered declines in both gross and net earnings in March. Earnings for the quarter, in most cases, are also substantially below those of a year ago. New York Central and Pennsylvania are striking examples of the declines in gross and net on eastern trunk lines.

March results of Union Pacific and Southern Pacific were also disappointing, although the latter by rigid economies in operation effected an increase in net in spite of decreased gross. Gross and net results of both these carriers in the first three months were substantially below 1924, Union Pacific, especially, showing 11.5 per cent decline in gross and a 32 per cent loss in net.

in net.

New England roads for the quarter are still ahead of a year ago, although March earnings were not up to those of March, 1924. Unusually good results in the first two months of this year was responsible for this improved showing.

showing.

The accompanying table gives comparative results of a group of important roads for March and the first

CAST IRON PIPE CO. **CURRENT BUSINESS** HOLDING UP WELL

NEW YORK, April 30—The current business of United States Cast Iron apple Company is running in satisfactory volume. Despite the fact that prices of its products are about \$8 at ton lower than a year ago, it is still able to show favorable results on business it has booked ahead. The De Lavaud method of centrifugally casting pipe is significant in this respect. While it is too early to accurately forecast results for 1925, it is generally understood that profits will average about half those for 1924. This would indicate a balance this year of \$20 to \$25 a share on the common after all charges and preferred dividends. Such earnings would constitute a good showing, well above the average of the past several years, even including 1924 and 1923, the best two years the company ever enjoyed. Earnings last year showed \$43.17 a common share, compared with \$21.92 in 1923 and \$1.51 in 1922

compared with \$21.92 in 1923 and \$1.51 in 1922.

French competition has resulted in French competition has resulted in lower prices for cast iron pipe, but it has had no material effect on tonnages placed by domestic producers.

Back dividends on preferred will be wiped out in June, after which it is expected directors will consider a distribution to common stockheiders. Nothing definite has yet been decided as to just what will be done regarding payments to junior share holders.

BUSINESS MACHINE'S NET UP International Business Machine earned \$4.34 a share on its no par value stock in the first quarter, compared with \$3.32 a share in the corresponding quarter last year. Net earnings increased to \$604,0. from \$576.000.

GOOD GAIN IN EARNINGS OF GOODRICH CO.

Tire and Rubber Footwear

Sales Well Ahead

of Last Year

New York, April 30—B. F. Goodrich Company officials are of opinion that earnings this year will exceed any year since 1919 now that tire prices have been advanced.

Increased earnings so far this year, however, are due to the fact that average cost of crude rubber consumed was considerably under the present selling price. President B. G. Work betieves the steady rise in crude rubber from 17 to 44 cents a pound makes an advance in selling prices imperative.

Tire and rubber footwear sales are Tire and rubber footwear sales are an advance of last year.

imperative.
Tire and rubber footwear sales are running well shead of last year. Plants at Akroh, O. are running at eapacity, making more than 25,000 casings and between 31,000 and 32,000 tubes daily. The business of branch plants in Canada, England and Germany has been satisfactory.

An important factor in the excellent showing by Goodrich last year was the installation of new and more mod-

The depreciation charge was \$2,547,-434 and a reserve fund of \$1,000,000 was set aside to meet future contin-

025,583, or 80 cents a common share, the depreciation charge was only \$2,-088,386, and no contingency reserve

088,386, and no contingency reserve was set up.

Net sales were also the highest since the war and post-war inflationary period, at \$109,817,685, compared with \$107,092,730 in 1923. In 1924 operating profit was 12.6 cents for every dollar of sales, compared with 6.6 in 1923 and 7.5 in 1922. Constant watch was kept on inventories, and on Dec. 31 they were only \$19,921,765, the lowest in the were only \$19,921,765, the lowest in the

resume common dividends until a more substantial surplus account has been built up. Dividends at the full rate of 7 per cent have been paid regularly on the preferred since organization in 1912. In that year \$2 was paid on the common and in the following year \$1. From that time thitl 1916 no common dividends were paid, but in the latter year and until February, 1921, common stockholders received payments at varying rates. In 1921 these payments were discontinued, and have not yet been resumed.

January 2, 1918, must also be available for inspection.

An American-born citizen is required to present birth certificate, or an affidavit in the absence of one. Naturalized citizens should have supporting papers.

Women married prior to Sept. 22, 1922 must submit evidence of her per cent have been paid regularly on

INTERNATIONAL PAPER PAYS BACK DIVIDENDS ON PREFERRED STOCK

NEW YORK, April 30-Interna tional Paper Company declared an in-itial quarterly dividend of 1% per cent on the new cumulative 7 per cent pre-

on the new cumulative 7 per cent preferred; also the regular quarterly 1½ per cant on the 6 per cent preferred, both payable July 15 to stock of record July 7. This latter dividend applies both to stamped and unstamped 6 per cent preferred.

It further declared an additional dividend of 33½ per cent on the unstamped preferred, payable May 18 to stock of record May 11. This additional dividend on unstamped preferred represents dividends accumulated and unpaid on such preferred prior to Oct. 1, 1916.

In 1917 the company made an offer to pay and settle in full these accumulated dividends by payment of 14 per cent in preferred, 12 per cent in common and 7½ per cent in cash. This has been accepted by about 97 per cent of the 6 per cent preferred stockholders, and there are now only a few stockholders who have not accepted. Declaration of 33½ per cent cash dividend will complete payment of all accumulations on the unstamped 6 per cent preferred, so that there will be only one class of 6 per cent preferred outstanding, stamped and unstamped stock being on the same basis.

ENGLAND BEGINS GOLD SHIPMENTS higher

COLD SHIPMENTS

LONDON. April 30—For the first time since the outbreak of the Great War, the bank resumed the publication of shipments of gold abroad. Today's anouncement, which was posted on the board, shows £287,000 worth of bar gold was drawn, of which £281,000 was for Switzerland, £12,000 for Holland, and £4000 for Egypt.

summer would have been 45 per cent higher than in the summer of 1924.

There has never been such an increase in any one year. Incoming orders have not been in sufficient volume to sustain the high rate of production in a number of important lines, and, therefore, unfilled orders have declined.

A reaction in the commodity market occurred in the last week of January, and continued through at least

3000 for Holland.

\$4.8648 UNION PACIFIC'S EARNINGS FOR YEAR

The Union Pacific Railroad Com pany, for the year ended Dec. 31, 1924, shows net earnings of \$35,753,204, after taxes and charges, equivalent, after sinking-fund requirements and pre-ferred dividends, to \$14.28 a share on \$222,291,600 common stock, compared with \$39,922,206, or \$16.16 a share, on the common stock in 1923.
Surplus after dividends was \$9,533,-625, compared with \$13,692,569 in 1923.

FRENCH GET PIPE ORDER French producers of cast iron pipe continue to underbid domestic manufac-turers, an order for 3000 tons having been received from the city of Detroit on the lowest bid.

Manila Electric Corporation for the year ended Dec. 31, 1924, report net income of \$1,124,049 after taxes, depreciation and interest, compared with \$1,060,740 in 1923. MANILA ELECTRIC CORPORATION 8

DUZ CO. SALES GAIN

NEW ENGLAND TRADE. HEAVY, BUT RECEDING

Activity Too High, Apparently, to Hold-Department Store Sales Poor

The sum total of the volume of trade transacted in New England during recent weeks has been large, although there is an increasing ber of reports of reactionary to cles and uncatisfactory bookings of cies and uncatisfactory bookings of new business, says the Federal Re-serve Bank of Boston, in its monthly review of industrial and financial con-ditions in the New England district. As a matter of fact, business activ-ity declined slightly in both February and March from the high level reached in January, a condition which exists, not only in New England, but in the country as a whole.

in the country as a whole.

It was obvious that the acceleration in business activity during the last half of 1924 was too rapid to continue

Orders Declining

If it had continued throughout the first half of 1925, activity during mid-summer would have been 45 per cent

land, and £ 4000 for Egypt.

One hundred thousand sovereigns were taken out, of which 87,000 were for India, 10,000 for Switzerland, and any March of the New England Business Activity Index reflects the net result of these several factors of the

husiness situation The cotton textile industry of New England continues to operate at a higher rate of production than a year ago. New England mill consumption of wool, however, was lower in March than in January and February or the corresponding month last year. On the whole, cotton mills are more active than the woolen and worsted mills.

Shoe Ontput Up

New England shoe production in-creased seasonally in March in antici-pation of the spring trade, being only, slightly less than in March, 1928. The building industry of this district

PENN. COAL & COKE

Pennsylvania Coal & Coke reports
March deficit of \$30,910 after tax, depreciation and depletion but before federal tax, compared with deficit of \$11,774 in March, 1924. Three months' deficit was \$158,684, compared with surplus of \$1002 in first quarter of 1924.

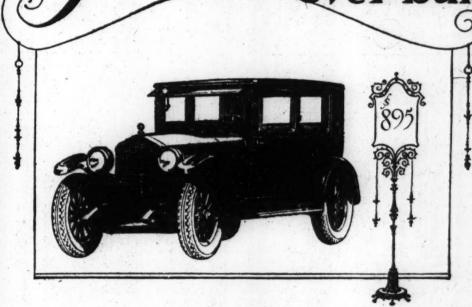

FRENCH GET PIPE ORDER

ing period a year ago.

Incidentally, the sales in April, 1924, were in larger volume than in any of the other spring months. Department store sales in March were only 3 per cent larger than in March, 1924, when ales were poor.

CALIFORNIA PACKING'S YEAR

The finest Essex ever built

Never Before Such Quality at or Near the Price

Today's Essex is the finest ever built. It is the smoothest, most reliable Essex ever built. It is the best looking, most comfortably riding Essex ever built. And the price, because of volume, is the lowest at which Essex ever sold.

Its overwhelming public acceptance confirms by actual sales supremacy the outstanding leadership of Essex value. Never was that position so clear, and so rightly deserved, as today.

Essex won its great recognition on the issue of finest quality, performance and utility without useless size, weight or cost.

And with its low first cost and operating economies, you get qualities of long-lasting, reliable performance, smoothness and riding ease.

Essex requires little attention to keep in top condition. Its maintenance cost, we believe, is the lowest of any car in the world. You sacrifice no motoring pleasure, comfort or good looks that large, high-priced cars can give.

Can any other car within hundreds of dollars of the price satisfy you so well?

FREQUENCY IS BIG FACTOR IN SOUND WORK

Hartford Engineers' Club Hears Talk by Bell System Technician

HARTFORD, Conn., April 29-Asserting that "frequency" was a sort of house-numbering scheme on that new "Main Street," the ether, Mr. J. Warren Horton before the Hartford Engineers' Club last night exposed the mystery which surrounds this

dad's ignorance. With several tablesful of ingenious apparatus, brought up from the Bell tube appears as an electrical ele Telephone laboratories in New York, Mr. Horton showed that the frequency of an electric current determined the pitch of the sound it made in a loudspeaker. It also served as a tag on groups of currents, so that they could be mixed up like childunscrambled when their trip had vacuum tube, functioning much like

bilities, for by it, from a considerable an experimental hookup, Mr. Hornumber of different programs going through the same medium—the ether listener can select that one talk assumes. which interests him. In fact, frequencies are a good deal like street numbers - every radiocaster must have one, and preferably one that is easy for his listeners to tune in. 381. I have built a Silver-Marshall set But "Ether Street," though long, is and find it good with one exception. There paved and lighted only for a block or two, and in the short section where the crowds gather there is room for only a few stores. Hence many radiocasters must share their air or not. This sound resembles a very space with their competitors.

One of the major problems which the laboratories have worked out for the American Telephone & Telegraph Company is the "carrier" telephone used on long distance lines of the Bell system. While a pair of wires will transmit frequencies up to 35,000 waves per second, the voice requires only a range from about 250 to 25,000. This range from zero to 250 has long been used for telegraphy, and within the last 10 years the upper range has been divided off into "frequency bands" for additional telephone paths. Thus a single pair of wires can be made to single pair of wires can be made to four telephone conversa-

Chicago Is Received by Many Australians

Chicago, Ill., April 30 THE Chicago Daily News announces that its radiocast station, WMAQ, was heard 9000 miles away in Australia, last Thursday morning, and that the radio waves spanned the distance in one-twentieth of a second. A cablegram relayed by the National Association of Broadcasters, under whose auspices a test program was carried out, stated that hundreds of persons had good reception of stations WMAQ, WAHG, and KFI, with medium voice from WOR, WHO, WBCN, and WLW.

term. Formerly used only by en- a circuit can be made to pass al gineers, radio has brought it into frequencies above, or below, a given such general use that nowadays the value, and reject the others. Or it man who doesn't know what fre-two given values. The "radiophan's" quency is will covertly ask his tuner is a special form of the latter neighbor in the trolley car, lest his since it will pass only one particular own high school son discover his frequency. Then to raise the voice or telegraph frequencies to the proper value, the versatile vacuum

vator. By combining the original voice, ranging from 250 to 2500, with a "carrier wave" at say 20,000, a new group of currents emerges at 20,250 to 22,500. This group is transmitted they could be mixed up like child-over the line, and at the other end ren at an Elks' outing, and yet be is brought "back to earth" by a the radio detector. By plugging in This gives radio its great possi- a loudspeaker at various points in ton showed the audience the various forms that a "carrier" telephone

Question Box

badly scratched phonograph record, it One of the major problems which will crackle along accumulating in a loud single pair of wires can be made to handle four telephone conversations and two telegraph messages.

Pointing out that the dots and dashes of the telegraph were much slower than the vibrations of the voice, Mr. Horton explained that telegraph needs a narrower path than telephone, and so 10 two-way telegraph circuits can be set up in place of one of the telegraph and three of wires.

This separation of a line's capabilities into so many individual paths is done by a remarkable device, the electrical filter, invented by George A. Campbell of the American Telephone & Telegraph Company. By a combination of coils and condensers, (Ans.) You are certainly in a more or less ideal location as far as isolation is

Evening Features FOR FRIDAY, MAY 1 EASTERN STANDARD TIME

EDITORIALS

When Nathaniel Hawthorne first visited England, he came back to his quiet Manse in Concord

The Flowing Tide to Europe

and wrote of what he had seen under the title "Our Old Home." It was in that spirit that the New England worthies of three-quarters of a century ago braved the month's passage by sail to visit the scenes

familiar to their forefathers, and make their own acquaintance with the land whence they were sprung. Financiers, merchants and lawyers, literary men and artists-the latter very rare in those days-all made their way to England as soon as their purses permitted.

It was a high adventure at a time when even the famous clippers took more than two weeks for a record voyage and a month was nearer the average. No wireless kept ship and shore in constant communication. No electric lights made cabins brilliant. No refrigeration made possible a table as varied and as loaded with delicacies as in the best hotel. Two thousand tons was the measure of a "noble ship," while today 20,000 is commonplace and 40,000 not the topmost limit. Steam heat and hot and cold water in the staterooms? Away with such effeminacies! In the brave days before the war-the Civil War in the United States, of course-people who went abroad went down to the sea in ships, not in steel-framed hotels set afloat

And how they went, the New Englanders and Atlantic Coast folks of that day, for the European attraction had hardly then spread beyond the seaboard states! Pick up the biography of any man of that era who had done anything to cause his "life" to be written and you will find the fourth chapter, at latest, headed "First Trip to Europe." Longfellow, Emerson, Willis, Bryant, the Adamses, Irving, Allston, Westthe list is interminable, a true hall of fame. And all then went primarily to England like a flock of homing pigeons.

Today it is not the chosen few who go. It is estimated that over 200,000 Americans will visit Europe in the coming summer. Happily they will not all write books about it, as did the early New Englanders, but newspaper editors who have to stay at home will testify that a very considerable number are ready to record the experiences, novel to them, in articles. Nor will they all, or perhaps even a majority of them, look upon England as "back home.

It is a new American traveling public that is taking to the sea now. Sweden, Norway and Denmark, Germany, Austria, Hungary, Italy, the new states carved out of Russia and the new commonwealths grouped together as Czechoslovakia and Jugoslavia, will all have loyal sons and daughters trooping back to the old homesteads and finding them as we all find the revisited homes of our youth, curiously dwarfed and commonplace in comparison with fond memories of them.

But it is a healthful instinct, this desire to visit an ancestral place, and it is a worthy ambition, too, for those whose long-time American heritage has left them no such homing spirit to still seek the scenes of the Old World for their beauty and their instruction. It is all right to see America first, but all wrong to see it only. There is as little virtue in the sense that spurns what some used to call "the effete nations of Europe" as in the one that boastsas too many do-of never having been west of the Hudson River. To be truly cosmopolitan, a man should know his own country as well as foreign lands, but to know it alone is to be narrowly provincial.

The Christian Science Monitor today devotes a very considerable portion of its space to helpful and suggestive matter bearing upon European travel. If perusal of it tends to develop what the Germans call a "wanderlust." let it be remembered that that is no malign ailment. provided it doesn't become chronic. The sagacious Lord Bacon in those essays which, he said, "come home to Men's Businesse and Bosomes," declared that "travel in the younger sort is a part of education; in the elder a part of experience." Ardently advocating it in either case, he closes with an adjuration which suggests that, home-coming globe-trotters in the sixteenth century were not wholly free from some of the amiable affectations of today, for, he writes of the returned wanderer:

"And let his travel appear rather in his discourse than in his apparel or gesture; and in his discourse, let him rather be advised in his answers than forward to tell stories; and let it appear that he doth not change his country manners for those of foreign parts, but only prick in some flowers of that he hath learned abroad into the customs of his own country.'

Court officials and enforcement agents in the federal district of southern New York are hope-

Padlock Courts Clearing the Dockets ful that the present session of what is known as the padlock court will materially reduce the number of cases pending and aid in clearing the docket of causes which have awaited disposal

for more than a year. Indeed, some of the cases, it is explained, are so old that the Government finds itself unable to produce proof of violations complained of, due to the absence of important witnesses. In other cases the defendants have disposed of the property upon which alleged nuisances were maintained. Many of these cases will be dismissed and attention directed to those of more

recent origin. Before a tribunal was established to deal exclusively with those matters in which the Government sought padlock orders which would compel the absolute closing of property where nuisances existed, such cases necessarily were taken up in the regular order of business along with the other causes filed. A postponement granted for any reason often meant a delay of a year or more, the nuisance being continued under some form of bond or undertaking which made its suppression pending a final decision impossible. These continuances,

under the pressure of full dockets, were frequently granted almost as a matter of course by some of the judges, upon recommendation of equally overtaxed prosecutors.

Now, under the plan inaugurated by William Hayward, the former District Attorney, and more vigorously followed by Mr. Buckner, his successor, there is nothing to prevent the early trial of the cases which arise. Many of the defendants, realizing this, have expressed a willingness to plead guilty and to accept a padlock closing order, especially as they have been informed that those who do not contest such action will be dealt with leniently, whereas those who demand trials will, if found guilty, be punished as severely as possible under the law.

The ordinary supposition of innocence in cases of those accused of crime hardly maintains in those instances where a prosecuting officer has obtained evidence sufficient to warrant a request for a padlock order. The guilt of the defendants has, it would seem, been pretty well established in advance of the trial. Theoretically a defendant is presumed to be innocent until his guilt has been established beyond a reasonable doubt. In the case of the traffickers in intoxicating liquors in violation of the law, they seem to be obliged to counteract, in almost every instance, a presumption of guilt. Their offenses are so flagrant and so notorious as to destroy any merely theoretical contrary pre-

Probably the greatest need at the moment is that it be made plain to all violators of the national prohibition law that immediate punishment awaits those apprehended and brought before the courts. Heretofore the percentage of cases in which the Government has failed to prosecute, or in which juries and judges have refused to assess the penalty, has induced almost a wholesale disregard for the law on the part of vicious and predatory bootleggers, saloon keepers and brewers. The assurance that those accused will be quickly tried and as quickly punished will do more to bring about an era of law observance than anything else that has thus far been proposed.

Many Americans have already decided for themselves that the international opium conference in Geneva, which was held some time ago and which was given a considerable amount of unpleasant newspaper publicity, was not as black-especially with reference to the part played by the United States-as it was painted. Hence, it is particularly heartening to learn from an absolutely reliable source that a "smoke screen" was placed between the public and the facts, and that the conference was far from being a "dismal failure." "Notwithstanding the extraordinary opposition and disillusionment and wasted weeks spent in wrangling over nonessential details," Mrs. Hamilton Wright, an American delegate to the conference and an authority on the opium question, said on her return to New York recently, "the United States did, as a matter of fact, make much greater headway than the world is aware of, and if she is prepared to 'carry on,' the problem is infinitely nearer its solution.

Several specific proposals for improving the conditions of the working classes in Britain were put forward in the

A Fruitful Debate on Socialism

course of a recent debate on Socialism in the House of Commons. The discussion was initiated by Labor members who regolution favoring "the social

ownership and democratic control of staple industries and the banking system." Conservatives followed with an amendment declaring for "the maintenance of the present economic system." The stage was thus set for an entirely academic dispute. Suggestions as well as theoretical arguments, however, soon emerged.

Walter Windsor, mover of the Labor resolution, told an instructive story illustrative of the advantages of a long bygone state of things where each family was a self-contained unit subsisting upon the produce of land of its own. 'My grandfather and grandmother," he said. "lived in a small Welsh village among the hills. My grandfather had built his own house. He had made many of his own tools at the village smithy. He had made most of his own furniture. He could tan hides, and make leather, make his boots and make his clothes. My grandmother, along with him, could look after the farm. She could churn, make cheese and butter, take the wool from the sheep's back and pass it through all the various processes necessary to make cloth to clothe her children. My grandfather and grandmother knew at least a dozen or fifteen trades and knew them well, and if they had been pitchforked on to Robinson Crusoe's island they could have provided all that was necessary for their family." The advent of modern machinery had ended this idvllic state of things and Mr. Windsor looked to Socialism for a remedy.

Major Stanley, seconder of the Conservative amendment, on the other hand, found that what Mr. Windsor had described was an example of the educational value of the ownership of property by the individual.

"Ownership of property must be as wide-spread as possible," Major Stanley said. "It is our hope that by schemes of copartnership which will result in a condition where every worker is a capitalist to some extent and every capitalist is a worker in some condition or other, by schemes of small holdings which will result in as many men as possible, within economic limits, going back to the land—we hope we shall arrive at the goal of a property-owning democracy. That goal will need sacrifice, but I believe that what is called the capitalist class is prepared to make that sacrifice, if it can see clearly that it is going to be to the good of the

Sir Alfred Mond also made a contribution upon equally sensible lines. Speaking for the Liberals, he said, "if you can prove to us that anything you want to do in any of the staple industries will bring about an improvement, we will examine it, we will go into it, we will be ready to consider it; but it's no use carrying on general denunciations or general appreciations of either one policy or another. You will not succeed in converting those who oppose the

idea of the abolition of private enterprise or private initiative, what we consider the inherent right of the individual to develop himself to the best of his ability with the greatest liberty."

These are statesmanlike expressions. That

they should have been evoked by a partisan debate which was not even pressed to a final division should hearten those who look to Labor and Capital gradually to work out for themselves a mutual settlement of the differences which now imperil British industry.

The mimicry of war, that apparently forms a necessary feature of the pageantry with which

The Military Side of Patriotic Pageantry

Americans are celebrating the achievements of their forefathers in winning their present-day freedom, naturally and inevitably thrills thousands who watch these festal spectacles. It in-

spires with gusts of triumphant emotion other and more numerous thousands who read about them in the newspapers. The swords, the guns, the drumbeats, the volleys of musketry, were essential parts of the drama which from the small beginnings at Lexington and Concord ended in the great triumph at Yorktown, giving American liberty to the Nation's future millions and American ideals and example to the world. There will be more and more American pageantry of war in the next six years during delebrations of one hundred and fiftieth anniversaries of events that were started on Lexington Green and at Concord Bridge.

Many observers of these pageants will deprecate the military flavor they will have, and some will fear that the anniversary years will do harm by inculcating a military feeling in America and exalting the glory of battle. But most fortunately there are abundant signs that Americans of today do not give undue prominence to the warlike aspects of the struggles and sacrifices of their ancestors. They rejoice in the portrayal of their forefathers' bravery. They feel the natural glow of prifle in beholding the pictured prowess of the patriots of 1775 and 1776. And they realize that their forbears, to defend the liberties and rights they claimed as Englishmen, were compelled to use the only means and the only weapons with which this could be done and to meet force with force. But individuals and leaders who speak for the people on the platform, in the pulpit and in the press are calling attention to the enduring blessings to the country and to the world that sprang from those years of struggle, rather than to the fleeting glory that accompanied the use of the swords and guns which were necessarily used at that time.

A small incident at the recent celebration at Concord illustrates with a pleasant touch of humor the present American attitude toward the military side of patriotic pageantry. Thousands of spectators at the bridge were waiting for the oncoming patriot soldiers to answer the volley of the British regulars, and fire the shot that was to be heard around the world. All in the throng looking on were back in 1775. "Would they fire?" "Why don't they fire?" welled up in every heart. One onlooker could wait no longer. He, at least, would dare and drive the "redcoats"-and the tiny report of the boy's cap pistol rent the air.

Its explosion, to the tense excitement of the watching thousands, was as loud as that of a sixteen-inch gun. Instantly their pent-up feelings, waiting not so much for a crash of muskets or the wild work of war as for the signal of the coming of all that made it possible for them to be there, broke loose—in free, hearty laughter, in which generals and dignitaries joined, at the smallness of the mimicry compared to the great results of the battle.

It will be in such a manner, without doubt, that Americans will prepare and watch their coming pageants. They will give more heed to the invaluable things their patriot ancestors won by the sword than to the guickly fading glories of the war they had to fight

Editorial Notes

The correspondent to The Times of London, who wrote recently upon the frequent bandying of the word "liar" across the floor of the House of Commons, a practice, which, he urged, hardly adds to the dignity of debate, was more than justified in his complaint. In his letter he recalls the phrase used by an old clergyman named Palmer, a nephew of the great Sir Joshua Reynolds, who, finding himself using that unsavory word too frequently, substituted for it the remark, "Mr. So-and So, your memory fails you on matters of fact." Certainly such a phrasing would help to round of the asperity of the blunt attack. But, after all, would not a "lie" by any other term be just as black? And if the charge is an unjust one dan one make it just by toning down the method of statement?

The six rules which the United States Forest Service has prepared in connection with American Forest Week should be read, marked and inwardly digested by all campers and others who at any time visit the wooded areas of America. These rules revolve around the six subjects of matches, tobacce, making camp, breaking camp, brush burning, and how to put out a camp fire. While they are all important, the following instructions under the last mentioned heading merit perhaps most particular attention:

Stir the coals while soaking them with water. Turn with small sticks and drench both sides. Wet the ground around the fire. If you can't get water, stir in dirt and tread it down until packed tight over and around the fire. Be sure the last spark is dead,

An ounce of fact is worth a pound of theory. Hence an assertion of fact from an unquestionable source of authority regarding the benefits of prohibition refuses to be ignored. Said Theodore A. Lothrop, general secretary of the Massa-chusetts Society for the Prevention of Cruelty to Children, in a recent statement:

Whatever other statistics may show as to the value and effectiveness of national prohibition to suppress evils of intemperance, our records show that since prohibition, intemperance has at all times been less than half that prevailing before. The family man is noticeably less in evidence because of intemperance. The condition of women and children has correspondingly improved.

The Policemen and the People in Ireland

One is often asked the questions, "Is Ireland settling down?" and "What are the signs that it is doing so?" And they are not easy questions to answer satisfactorily. Had the establishment of the Free State taken place before the war, it would still be difficult to point to definite signs, within two years of that establishment. But when, as a consequence of the economic upheaval of the war, the establishment of the Free State came at a moment when the entire world was in a state of general moment when the entire world was in a state of general unsettlement, it is all the more difficult to find ards by which one can measure the progress of settle-

At any time the task would have been a slow one, simply because of the centuries during which the entire activities of the people of Ireland have been directed to the subversion of state institutions, toward rebellion against instead of obedience to authority. At the present moment, for many reasons the task is even slower than it would otherwise have been.

ortheless, substantial progress has been made; and in some ways that progress has been really remarka-ble. For example, the sign of stability in every state

is the policeman—that man, standing as the lowest but most intimate rung in the ladder of authority, who is helpless without the support, not of his superiors but of the people among whom he stands unarmed. Let me, therefore, take the policeman as a symbol.

If is well known that in Ireland the policeman, until the Free State was established was the sign and the

badge of something that was to be resisted and thwarted. He was not an expression of the people's wish for security, as in most other countries—as in all other countries where government is by the consent of the gov-4 4 4

He was regarded as the token of repression. He was an armed man, equipped and disciplined, with his coleagues, as an army; and though his arms might for years not be required, at regular intervals the men of the Royal Irish Constabulary would be seen in twos and threes cycling through the country with carbines slung shout their shoulders. Even when these arms were not required, the men

of the R. I. C. (a very fine body of men recruited with great care) were a race apart in the country, with every man's hand against them. They were recruited from the people themselves; but when a son of the people "took the belt" he cut himself away, and was expected to cut himself away, from the life of which had till then formed a part.

His isolation was a strange thing, not easy to define He spoke with the people and the people spoke with him, and often no isolation was apparent at all, but it was there just the same. I have been in companies of the people while they were speaking naturally, and of quite ordinary homely matters. A "peeler" approached the company; and without a word being said the conversation would be changed; and constraint fell, that was all the more marked because of the vociferous friendliness with which the conversation was sometimes continued.

Even when a criminal, whom the people reprobated. was to be found, no help was given to the "peeler" in the discovery. A whole county might know of his identity, and regard his acts with horror; but the policeman

the kind. A rough translation of the word "policeman" might be given as the "people's man," and when such an one is not the people's man he has naturally to fight a lone hand. But it is manifest that when the policeman has, in any country, since the first inception of police among nations been regarded in this light, law falls into disrepute, and a distance is inserted between the good order of government and the co-operation of the people that tends toward entire destruction of lawfulness in the mind of the people.

All this had to be changed when the Free State was established. The entire attitude of the whole people had to be altered toward the policeman. The habit of a century had to be turned in the opposite direction; and it is not necessary to read history to appreciate the formidable task that was thereby presented.

Within two years this task has been accomplished.

however. Immediately after the treaty was accepted the R. I. C. was disbanded, and a new force created, daringly—the Civic Guard. For a time there was no police at all, the old R. I. C. having been disbanded and the newly enrolled civic guard being still under training. During this interregnum the civil war broke

out, and banks were raided all over the country.
While this civil war was still being waged, while
every agent of the Provisional Government of the New Free State was a mark for attack by those who fought against it, the Civic Guard were sent in small detachments through the country. They were sent unarmed. For the first time in Ireland (and while civil war was being actually waged), an entirely unarmed police force appeared in Ireland. It was a bold venture; and a wise one. Many of its members were attacked by Repuband they were still maintained as an unarmed force.

Slowly and steadily they won esteem and support. Remember that they were all raw youths, who a few months before had worked on farms and behind counters. They had no traditions on which to call. They had noth ing to help them but their native tact, and the will of the people for good order.

By the combination, however, of these two things (which are not two but one, since the new guardsmen came from the people themselves), they have won their success; and today, by the admission of all, the policeman in Ireland stands solitary and unarmed; he is to the people the people's man; he can rely on the people's support; and his presence is the sign of good order, of submission to the Government and of the consent of the governed.

tlement in Ireland, I point to this that I do not hesitate to describe as a remarkable achievement, and a no less worthy portent. In other departments much has to be done. That is true, indeed. But concerning any people of whom so great a change can be reported in so brief a time, the signs of settlement can be affirmed.

The World's Great Capitals: The Week in Rome

The election of Field Marshal von Hindenburg as President of the Reich is welcomed in Italian diplomatic circles, writes the well-informed Agenzia Roma. in a spirit of benevolent appreciation and ticular prejudice." It is not believed in Italy that Germany will venture upon a new foreign policy in contrast to that which she has hitherto followed, and General von Hindenburg's frank declaration that Germany will carry out the international obligations assumed by its Government is believed here. The apprehension mani fested by several foreign statesmen, continues the agency is considered excessive and premature.

There is, however, a problem which affects directly Italy and Germany—that of the Upper Adige—over which there is some apprehension. Some of the German political parties which most actively supported General von Hindenburg's presidential campaign have in the past shown themselves as most ardent agitators of pro-Germanism in that region. The agency concludes by expressing the hope that these political parties will not exercise their influence to the extent of provoking manifestations, thus prejudicing the friendly relations existing between the Italian and German governments.

The plan to prepare an Italian encyclopædia, sketched by a committee of Italian writers, historians, university professors and politicians, has met with general favor and encouragement. It has been suggested that it would be well if the general lines of the new encyclopædia could follow those of the Encyclopædia Britannica. the difference that where more importance is given in the latter case to the British viewpoint, the Italian encyclopædia could contain more of the Italian atmosphere.

It is also intended to gather all information from reliable sources, so as to correct those impressions which have been created by the publication of historical books on Italy written mostly by foreigners who either did not thoroughly know their subject or dealt with it without considering the authenticity of their information. The Italian encyclopædia, which will be fully illustrated, will consist of thirty large volumes and should be completed in ten years' time. Senator Treccani, who has already made a conspicuous donation to the Italian state by his offer of the famous Bible of Borso d'Este, is the chairman of the committee in charge of the preparation for this great work.

An exhibition of a very original nature is being held in Florence just now. It is called the National Didactic Exhibition, and it is an attempt to give a comprehensive idea of popular education in Italy. A series of photogravures and sculpture reliefs from well-known monuments give one a glimpse of the art of teaching practiced in olden times.

The medieval period is well illustrated by frescoes by Benozzo Gozzoli, which depict vividly the treatment schoolmasters of their pupils. A large section is devoted to the Renaissance period, when the art of teach ing was so well advanced that it can almost be compared to the most modern methods of instruction. Not only were open-air schools known at that time, but many subjects were taught through symbols and pictures.

Modern methods are, of course, well represented. A very interesting part of the exhibition is the section professional, commercial and industrial schools for boys from twelve to sixteen years. The idea of such schools is being greatly encouraged all over Italy, and it is hoped that thereby many lads will be enabled to earn a livelihood later on as the result of having learned a craft. The foreign section is very poor, two countries-Germany and Poland-being represented. 4 4 4

A congress of musical instrument manufacturers was recently held in Florence with the object of organizing a general federation of the Italian musical industry, to which will also be affiliated the trade associations formed by the manufacturers of gramophones and disks, of wind and string instruments. At the congress the plano makers put forward the proposal that all Italian firms should avoid the bad habit of marking their instruments with fanciful names of foreign origin, a habit adopted in the old days when the modern Italian industry had not yet won recognition for its products. Traders will only be admitted to the federation who undertake to sell those instruments alone which bear the maker's name. The leading Italian piano factories are the Fabbrica Italiana forti of Turin, now being reorganized by a powerful financial group, and the "Anelli" factory of Cremona Both these firms produce instruments of high merit and, with other minor firms, are slowly but surely building up the reputation of the Italian piano.

Among the numerous documents which Austria Among the numerous documents which Austria is returning to Italy, according to the agreement arrived at last January, there are some of great historical importance and of particular value for the history of Italy during the past century in her struggle for independence. The most notable are the voluminous so-called "Constituti," by Federico Contalonieri, dealing with the insurrection in Lombardy against the Austrian rule in 1821—books which had been searched for in vain for many

4 4 4

years and were considered lost until they were found in the secret state archives of Vienna. There is also a rich collection of the statutes of several Italian com-munes, in all about 250, some originals and others copies and rare prints of the sixteenth century, referring to cities and communes of Lombardy and the Venetian Provcities and communes of Lombardy and the ince. Italy has also been able to obtain all political and administrative documents dealing with the provinces formerly belonging to the Austrian Empire and now annexed to the Italian kingdom.

The summer music course for American students, which will be held in the beautiful and historical Villa d'Este at Tivoli, near Rome, will begin on July 13, and will last exactly two months. The course is strictly reserved for American students, and numerous applications have already been received, thus insuring the success of the course cess of the enterprise. There will be two private lessons and one class lesson per week. The instructors will include such well-known people as Maestro Ottorino Respighi for composition, Maestro Consolo for piano, Maestro Corti for violin and Miss Valeri for singing. who will introduce the pupils to Italian methods of musical study. Living accommodation has been arranged through the Italo-American Socie duced steamship return passages from New York to Naples have been obtained.

Senator Corrado Ricci, one of the best-known Italian art critics and for many years head of the Fine Arts Department, who has already earned the gratitude of his birthplace, Ravenna, for having presented his valua-ble collection of books to the local library, has now made second donation of all the letters he has received during his career from authors and artists. During the past fifty years Senator Ricci has been in touch with the most renowned men of letters, historians, musicians and artists from all parts of the world, and his collection, even letters from men who only reached mediocre fame, makes interesting reading. It is calculated that no less than 20,000 autograph letters will now enrich the Classense Library of Ravenna.

Letters to the Editor

Brief communications are velcomed, but the editor must remain sola judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented. Anony-mous letters are destroyed unread.

'American Debts to Englishmen'

To the Editor of THE CHRISTIAN SCIENCE MONITOR: Your timely editorial, entitled "American Debts to Englishmen." certainly deserves the serious consideration of the American people. However, it appears to me that your sweeping declaration, that "To well-informed Americans any suggestion of the legal responsibility of the federal Government is unthinkable," is unfair, inas-

much as it impugns the intellectual qualifications of one who entertains such a thought, without inquiry as to The federal Constitution vests Congress with nower to pay the debts of the United States (Art. I, sec. 8, par. 1); to regulate commerce with foreign nations (par. 3): to execute the laws of the Union (par. 15), and to make all laws which shall be necessary and proper for carrying into effect the powers vested in the national Gov-

nment or any of its departments or offices (par. 18). The federal Constitution declares that no state shall enter into any treaty, emit bills of credit, tender payment of debts with anything but gold or silver, or pass any law impairing the obligation of contracts (sec. 10, par. 1). The Constitution of the United States and all laws and treaties made in pursuance thereof are ex-pressly declared to be the supreme law of the land. (Art. VI. sec. 2). Foreign states or their citizens may not sue states of the Union in the Supreme Court (Amend. XI), which is quite proper, in view of the fact that the states have surrendered all power over foreign relations to the federal Government.

The United States, at its inception, assumed the debts contracted by the Confederation (Art. VI, sec. 1). It did not assume the debts of the several states. It is not now responsible for the debts of the several states within the sphere of their sovereignty. But in international affairs there are no states in severality. "The Constitution of the United States established a national Government, and the only Government in this country that has the character of nationality . . . invested with all those inherent and implied powers which at the time of adopting the Constitution were generally considered to belong to every government, as such, and as being essential to the exercise of its functions." (Bradley, J., in

Knox v. Lee, 12 Wall. 457.)

This national Government is responsible for the conduct of its citizens and subordinate organizations toward foreign states and their citizens or subjects. It has power to press the claims of Americans, and international comity demands that it should accede to a like power in other national governments. Certain states have impaired the obligation of their contracts, in violation of a constitutional guaranty. Congress has power to enforce this

guaranty. Tacoma Wash A. O. T.

NIN WAR THE WA

Tourism Important to France as Valuable Commercial Asset

Estimate Based on French Experience in Former Years Expects That American Travelers Alone Will This Year Spend 6,000,000,000 Francs

By SISLEY HUDDLESTON.
PARIS (Special Correspondence)—
In the streets of Paris during the height of the tourists' season one is sometimes tempted to ask who is the foreigner and who is the native. Around one on the Grands Boulevards the language spoken by most of the people is English. In the restaurants and in the shops an attempt is made to speak English. Most of the establishments, from the Opéra to the Rue de Rivoli, are run for the convenience of the British and American visitor. "The whole of our staff speaks English" boldly asserts one emporium, and the jewelers, milliners, dressmakers, perfumers, hotel keepers, and a score of other kinds of tradesfolk who sell articles kinds of tradesfolk who sell articles de Paris of one sort and another, depend almost entirely upon the for-

In point of fact, there are always In point of fact, there are always in the city, according to estimates the North Atlantic Shipping Conferwhich appear to be reliable, about 600,000 foreigners out of a population of 3,000,000, and, in addition, there are tens of thousands of tourists from American tourist agencies

This is a junction at which one changes for everywhere." Many of the visitors are merely on their way to the south. The Riviera, indeed, seems to have been invaded by the lit is a pity that America has not

Its commanding the mountain is difficult.

position over miles of sparkling blue An excellent service of water, the varying greens of its surrounding wooded slopes and the
mauve outlines of the eternally
smoldering Vesuvius make a veritable glory of color pictures.

Description:

Despite its appearance of sophistication which the large hotels, the white villas, palms and gardens full casual wander through its ruins its of orange and lemon trees give to Naples, surprisingly rustic scenes and still be witnessed in the tortuous windings of its highways and Isle of Capri, whose soft blue outline byways. Flocks of goats are con-stantly shepherded along the sea-front, cows are milked in the streets, straight into the can of the purchaser, and the most staid travchaser, and the most staid trav-eler is sometimes to be seen on the tourists and a week spent in it will back of a small dun-colored donkey, prove a welcome respite from the his progress being encouraged by the ardors of sight-seeing. whoops of the populace.

Interesting Excursions

Naples is a town rather to be enlike Naples in character except that they are smaller and cleaner. The charm of these towns is very similar joyed than to serve as a Mecca for the sightseer, but in addition to beto that of the French Riviera, but as ing the starting point for many despring resorts they are infinitely lightful and interesting excursions, it quieter and cheaper and more to be possesses many sights worthy of note. Drives should be made to the points of Posilippo and Pozzuoli whence an unparalleled view of the town and bay may be obtained. The famed aquarium which stands on the seafront will probably prove somewhat of a disappointment, but th wise traveler will read a descrip-tion of the fishes in Ibañez's "Mare

Nostrum" before paying his visit. The museum ranks in importance with the Uffuzi and Louvre, and it contains many priceless statues, in-cluding a number excavated from the ruins of Pompeil and Herculaneum. Those from the former include the originals of the Dancing Faun (a rep-lica of which is in so many art-lov-Budapest has history, and it offers its fine public buildings, galleries, museums, palaces and parks for inworth seeing in their interiors, with the exception of Monte Olivetto, which contains the masterpieces of

DUBLIN MAY HOLD

MILAN EXHIBITS PROSPERITY AND CULTURE

Traveler in Northern Italy Has Choice of Two Glorious Routes

MILAN, Italy (Special Correspondence)-The overland traveler entering Italy usually does so by one of the three principal northern routes: either coming from Ventimiglia to Genoa, passing along the Ligurian Riviera and southward to Pisa, from which city he may branch off to Florence and the other Tuscan cities or else proceed southward to Rome; or else he enters by the Simplon or the St. Gotthard, passing through the great mountain chains which guard the northern frontier, and makes his first stay in the city of Turin or of Milan, going south to Florence by

If he come first to Genoa, he passes through a radiant world of blue and green and gold and silver, all gar-landed with flowers. On the one hand is the sea, on the other mountains and wooded hills, clothed with ilex, myrtle and cypress, where old "cas telli" perch on crags, and towns and villages climb high; where the houses are gayly painted pink and white and blue and yellow, and where orange and lemon trees, magnolias and oleanders, roses and wistaria, add their grace to scenes al-ready lovely in themselves.

A Great Italian Port

and he will come to Genoa, that old, proud, maritime city, from which the Crusaders once set sail, and into which the merchandise of the East was pouring before ever Venice rose to greatness; the city where Chris-topher Columbus was born, and which, from a magnificent past, has attained to a thriving present as one

of Italy's greatest ports.

From Genoa, passing southward along the coast, through innumerable tunnels which render each exquisite view a radiant glimpse set in blackness, the line passes Spezia, Italy's great naval arsenal, lying at the head of its lovely gulf, and Massa Carrara with its world-famous marble industry; Sarzana with its old castle, and Viareggio, the popular seaside resort, with its long stretches of pinewoods, and gradually nears Pisa, that noble old city of palaces, mirrored in the curve of its river, a city of quiet streets and squares, and that of that green lawn whereon are set, in their opal-tinted marble beauty, four of the most celebrated architectural monuments of

Pisa's Glory Departed

Piss, once, as Macaulay designated er, "Queen of the western waves," before the sea retreated and left her her greatness and wealth departed, to diminished grandeur, subsequent subjection, and, today, to the quiet life of a provincial city, with a fine university and many lovely and noble buildings to bear witness to great traditions and ancient splen-

From Pisa the journey is little more than two hours to Florence, a city which no traveler in Italy would willingly pass by. If, however, the route chosen be that of the St. Gotthard, the way is marked by the grandeur of Alpine peaks, of steep ravines, and affords lovely glimpses of the calm and radiant lake district. until, across the broad Lombard plains, the traveler reaches Milan. once the center of a great and powerful duchy, now one of the wealthiest and most progressive cities in the whole peninsula.

Renovating Scala Theater a city throbbing with manufacturing and commercial activity, and af-fording a fine example of co-operative generosity and public spirit as manifested in the support given by its citizens to all projects that can ennoble or increase the usefulness of their civic life. Recent evidences of this large-minded attitude have been afforded in the renovation, at great cost, of the celebrated Scala Theater, and in the more recent foundation and endowment of the University of

Here he will gain an impression of that industry and activity which characteria. Americans especially ought to little blue rosemary flower. that the northern coast of the Med-

middle California. It never rains between June and the end of September. There may be a thunderstorm or two, but the land is so dry that, half an hour after it is over, people are playing tennis again. The fact that tennis is played so assidufact that tennis is played so assiduously surely does away with the idea that it is too hot for pleasure. The sea is perfect for swimming and the sands and rocks for sun bathing.
The hotels that are open are good and well arranged for warm weather, and the summer visitor gets a welcome that there is no time to give the winter crowds.

Sycamores in Full Leaf To those who know the Riviera only in winter, the greatest change which they will see in summer is the greenness of the country. The sycamore trees which line the roads are all in full leaf, making a complete shade from the sun overhead, instead of presenting, as they do in winter, only their bare, drab trunks and gnarled branches.

The reeds are no longer the untidy brown border to the fields as in winter. They are green, too, and have grown to 10 or 1° feet high.

IN BUCHAREST

Its People Are Happy and Prosperous-Widespread Politeness Prevails

BUCHAREST (Special Correspondence) — To Bucharest by the Danube from Belgrade is a 36 hours' journey. -A comfortable flat-bot-tomed paddle-steamer starts at dayight with the current, down a broad valley which contracts into a gorge in the Carpathians as the day wears on. By noon the river has become a boiling current in which occasional black rocks appear. Precipitous crags close in on either side, broken at intervals by terraced fields with vineyards, cherry orchards and hop plantations. Further on are the famous Iron Gates, where the steamer glides swiftly through a narrow channel between gray stone em-bankments, away from the main YORKSHIRE TO INDIA stream of the Danube, which boils over rocks on the left.

Giurgia, the river port of Bucharest, is reached the following mornin a big car mart in Piccadilly has ing. This is a rising city, with busy many fine public buildings. A twounpretending accommodation can be obtained. The people are cheerful and apparently prosperous.

The shops are such as might be found in a small market town in England. French is understood in most of the offices, and extraordinarily widespread politeness renders the path of the traveler easy.

Good Will Found Essential to Common Understanding

Lessons of Travel Show "Fear of Strangers"

Was Merely Darkness of Ignorance"

Condition of the for the world as it is now, but is so obviously an easy understanding to get. It requires but one thing: good will. In this new voyage of discovery, toward a world Columbus never saw in his dreams, if it is to be successful we must

By H. M. TOMLINSON Special from Monitor Bureau

LONDON-What is it we learn in travel? Now, might it not be as reasonable to ask a man what he learns in walking or dining? Such a queswalking or dining? Such a question might provoke the cynical inquiry as to the means by which a man ever learns anything. To what degree must he consciously turn his head if he would be receptive of a new idea? There is no telling. The wind bloweth where it listed We and the constant of light. Perhamment of light provides the discoveries, we sible to those early explorers, but it is possible to us: we must set out on trol of power, and have altered the our voyage prepared to surrender to others much that we value, much that it might be to our advantage to retain. We have to learn to give up. new idea? There is no telling. The fied. We want for that work another But the loss of a few prejudicial wind bloweth where it listeth. We often acquire new knowledge without heins of the control of th out being aware of it. Light falls

upon it presently.

It depends, perhaps, on what we are willing to accept as evidence. It is not uncommon for a man to over-look or reject, without being aware of it, of course, strange things that do not accord with his prejudices. If he does not understand them, either they are not there, or they are of no importance, or they are wrong. He will escape, if he can, from the challenge of an unaccustomed thing, from another way of looking at life, from the aspect of an idea he has not seen before. What is not native to him is not likely to be right.

Friendliness Extends

There is nothing more foreign about a strange people, for instance than the smell of their cooking. Quite often it takes some time for our habi-tude to homelike smells to submit to that alien odor. But at last we for-get to dislike it. Or rather, we forget it altogether—we get used to it—and presently find that that foreign food is quite to our taste. And if by any chance we are reminded afterward of that foreign scene, when we are home again, a pleasant memory is stirred. We find ourselves thinking of those distant folk with some affection. They were much the same as curselves, even if they were Dyaksthere was quite enough common ground with them to make for cer-tainty and comfort. In fact, we discover at home, to our surprise, that we have greatly enlarged what we should call the boundaries of the really habitable world. Its friendliness has become more extensive. It includes even Borneo.

When we see the results of the exuberant emotion of nationalism: the fierce quest by foreigners of that elusive phantom known as Security the pale fears which demand ever more battleships and guarantees—the doubts which seem to seize foreigners whenever people about whom they are ignorant make a move which is obscure; whenever we see news of that kind in the press (which is always noisily full of it) we are indiscovery. But clearly we have made clined to despair. Will there ever be unity in the world? 10 years it has dawned on many anxious souls that even great na-

Its round-ent through man's clever inventions. yet properly realized it. Its roundness is a mere image of the geography books. We feel today almost as awe-stricken by the sundering floods as the early ploneers when they looked westward from Portugal. What is Cracow to Ohio? What is Clebes to Hanover? What can Java possibly mean to Ancoats? Some of us have no doubt now that these places are as intimately related to each other as distant members of the same body of life must neces. the same body of life must necessarily be. But the folk of these places do not yet see that. Their behavior trouble is we don't know what to may be antagonistic and mutually say to them. despair at the proof of their antagonism. the streets in opposition to the cele-brated "outside cars" with their in-imitable jarveys, most of whom pos-sess an almost inexhaustible stock of fairy tales to giadden the hearts of travelers, who as a rule take some

poise for satisfactorily negotiating a trip on a Dublin side-car.

County Wicklow, "the Garden of Ireland," can best be visited from Dublin. This area includes Bray, a delightful seaside resort. 12 miles out, and from here one can get very quickly to Powerscourt domain with its wonderful waterfall, the Dargle, and the Gien of the Downs. Of course Glendalough is regarded as one of the beauty spots of the whole country, and '1 this neighborhood is try, and 1 this neighborhood is Glenmaiure, and a little further on Rathnew and Woodenbridge, to say nothing of Ayoca, immortalized by Thomas Moore in "The Meeting of the Waters." There is fairly good hotel accommodation available in these places, and the roads in County Wicklow are kept in a very sound state of repair, so that motorists can look forward with confidence to some delightful touring in this attractive country.

See Killarney First

Excellent railway facilities and specially reduced fares for tourists are being provided by the National Railway this year, so it will be an easy matter for those who wish to take in the southwest and west-Glengariff and Killarney. "You must see Killarney before you dare say you have traveled." was the opinion expressed by Twells Brex, and those who have seen Killarney will no doubt in large measure agree with him. Special motor tours are organized in this particular area and they afford great opportunities for taking in a big range of the Kingdom of Kerry, studded as it is with remarkable features. Close by there is a splendid array of stern and majestic America.

ing still to the north, one reaches Galway, "the City of the Tribes," and the headquarters of those who wish to explore that wild and beautiful stretch of country known as Conne mara. Mountains and lakes are seen on every side. Connemara includes the following places worth visiting: Clifden, Westport, Letterfrack, the Pass of Kyne. Renyvle. Leenane at the head of the Great Killery, Croagh Patrick, Malloranny and Achill Island, which should not be missed

The of Ronda. I sit there with a bootterrifying Don Juan Tenorio in the black tugging at my feet. From end falls at the feet of superstition, him I have learned nearly all I know about Ronda. He is a thick, blackhaired, dark-skinned, gypsy-seeming youth, with eyes like big olives, and a face as red as the soil around. Handsome, familiar, mocking, pleading, violent, innocent, there he kneels. He boasts about his life, tells me ngs, and works his way into my affections. For hours every morning until the white dust begins to rise in the mountain winds, my shoes carry the smile of his importunate

where his father used to give a hand at all kinds of jobs. Knows Seville. Merry province, Seville. The happi-est in all Andalusia. He says the hind at the heaving range of mountains beyond, burning rocks and giant family went to Gibraltar and La gray and violet lines leaping higher,

masses. Francisco's last tale is awful. To end with a smile like that I suspect by his winning smile that handy man, his father, did and expect one to believe everything! rather well in contraband. It is the Innocent, guileful Francisco. industry of La Linea. His son Fran-think. eisco, the bootblack, set up his boxes, gorge has its Doña Ines. I'll be his brushes in Gibraltar, but there was no money to be made there. Too many bootblacks. Not enough

day and somehow, over those tre-mendous hills and in the bursting heat arrived in Ronda. How cool it was there! I was so thirsty, says Francisco. In Ronda they live in a hovel at the edge of the black gorge that cuts the white town in half and splits open the cliff to a depth of 600 feet. From their window—a hole in the wall—they look down sheer into the chasm and across to the other wall of the cliff 100 yards away. Down at the bottom the blue light of the sky or the air of the world scarcely reaches. The sheer yellow cliffs drip with moisture. There is a hanging heat in the gorge. One hears only the hum of insects, the whir of a bird's wing and, under all, the far-away struggle of the water pushing toward the mills of the Vega. At night, says Francisco, it is a well of ink. One drops a peb-ble and cannot hear it fall. White and gleaming houses rise flush from the edge of the chasm. Here it is that Francisco and his mother live.

Francisco finishes my shoes and says he will show me places. He takes me down the white streets, past the houses with their windows barred to the ground and looking like giant birdcages; through the square where thousands of peasants in highcrowned hats are talking and wan-dering. Steam flags about the doorways of the huts, where women are frying churros, oily and serpentine doughnuts which you carry away on a stick or on twine as though they were curtain rings, and dip into the thickest, reddest, cinnamon-flavored chocolate. There are herds of goats in the market, in the streets, and on the stony hills outside the town. Francisco says there is not a cow in Ronda or in the whole of the Vega. In the market and on the narrow bridge fixed so carefully into the ter-rible chasm, are strings of mules and donkeys, their deep bells striking.
The mules carry wide panniers on poles. Humbly the silver donkeys step under pulling sacks of flour. Slender, silver donkeys; the gypsies trade in them.

Houses Like Birdcages

Moorish Part of Town

Francisco takes me over the bridge Ronda, Picturesque Town to the dirty, tumble-down Moorish part of the town, the old citadel. He me the crurabling girdle of the shrines, the churches, the wide weight of the unclouded sky and the golden pressure Cock crow is bugle call to the sun. At night it rests in its encampment behind the mountains, and the moon wanders from star to star, and pours r compassionate light upon the

We are on the steep path leading to the flour mill. The gorge widens and the water foams into the swim-ming light of the Vega. The town is now 600 feet above us, a frail thing of crockery and earthenware. The cliffs are burning. The pink vapor of the almond blossoms is at their summit and the emerald wreath of

Stern Rampart of Stone

Most beautiful of all is the bridge across the gorge, not a light path, stretched with grace like a hand to the cliff, but a stern rampart of stone forced to the bed of the stream, keeping out the sun, with a long de flant arch to it, lest any one should say it was easy for stone to be terrible, but could it be beautiful.

But as there is no room for us beside Nils Holgerson on the wonderful gander we will here have to be content with it is easy to people the boxes and entreating them to join him in the mental flying machine as it covers some of the 448,277 myriads that go Canals of Sweden Reveal Natural Attractions of Lovely Land to make the land of Sweden.

For those not particularly interested in winter sports—summer is the right time in which to see Sweden. And tourists arriving at Gothenburg on the west coast do well if they take the Gota Canal route, instead of the train, right across Sweden to Stockholm, the capital uilt just where Lake Malaren lets its fresh waters mingle with the salt

This trip takes about three days and is an unbroken chain of beau-tiful sights: the boat making its way through smiling meadows and fragrant woods, over blue lakes and ere and there stopping at some historical place, giving the tourist ample time to step ashore and do some investigating. Before leaving Gothenburg it is indeed worth while to pay a visit to Trollhatten, Sweden's greatest water-power plant and one of Europe's chief works. It is interesting to know that no part of ope is as thoroughly electrified by water power as Sweden

Town Built On Islands

Arriving at Stockholm, the visitor is impressed by the fact that the town is built on islands which are connected by bridges, thus giving Stockholm something that has entitled it to the name: the Venice of the North. The Noorstrom-running right at the foot of the royal palace and being the place where the commingled forces of fresh and salt water form merry whirlpools—this stream may be looked upon as the center and heart of Stockholm. Along it are grouped the principal buildings, in addition to the palace: the Parliament House, the Opera costumes, all reflected in the large figure, so intense and earnest of exHouse, the Grand Hotel and the Namirrors on the walls in the light pression, is not only a noble monuvalue of the operation that a man would act as wisely if he could premirrors on the walls in the light pression, is not only a noble monutional Museum. At its embankment from hundreds of candles. Inside are the many small white steamers the sturdy walls of Gripsholm the kings but also a fitting symbol of the that take the citizens out to the atmosphere of romance still lingers, unquenchable love of freedom and inarchipelago of Stockholm or to the and brings to the modern visitor a dependence of thought and action cautiful places on Lake Malaren. living vision of by-gone days.

Another fine view of Stockholm is gained from "Skansen," the outdoor only about an hour's ride on the The north and south of Sweden are museum arranged in a natural park train from Stockholm. Uppsala is one of the two university towns of a most splendid outlook over the sweden—the other being Lund in an arranged in a natural park train from Stockholm. A Yearly Exodus

In the meantime there is, every year, a great exodus of European August. Founded by the well-known musicians to America, and an almost composer, Rutland Boughton, it has year to attract patronage from the ous railroads has resulted in the educational and professional classes. Steam roads taking effective action of the composer and the composer of the steam roads taking effective action of the composer and the American public to Europe. It is quite possible that some ingenious historian of the dim future will account for the second phenomenon by

Musicians traveling for pleasure instead of business, if there be any such, are provided this year with the best of excuses for visiting Prague and Venice. The International Society for Contemporary Music has chosen these cities for its and the prejudices of symphony con- as harpsichord and violin, harpsicert audiences.

Selected by an international jury of composers, these programs seem designed to make the hair of ordinary concert impresarios stand on end, for they represent the latest and most daring adventures of contemporary musical thought. The same may be said of the five programs of chamber music which are to be given in the historic city of the Adriatic during September. The stones of Venice will re-echo the strange dissonances of modern music, and as its listeners float back in gondolas to their hotels there will be no roar of wheels to drown the memories of the inner ear.

Donaueschingen Festival

In August the modernist may further indulge his taste for adventure by a visit to the Black Forest where, since 1921, the Donaueschingen Festival is held annually, for the encouragement of contemporary music. under the patronage of the Prince of Fürstenberg, whose castle-residence, the guidebook tells us, "has ancient and celebrated musical traditions.'

For those of more conservative musical tastes a visit to the Three Choirs Festival in England affords an experience peculiarly English Held in yearly rotation at Gloucester Worcester, and Hereford, this gathering is a happy illustration of the English gift for compromise. Its aim is neither strictly artistic, social religious, nor charitable, but a curious compound of all four. The mosphere of the cathedral and its close permeates even the local con-

The musical nationalist can find much to interest him at the National Eisteddfod of Wales, which has survived 1200 English summers and is certain to continue until the last Welshman chairs himself as Bard for

Contrasts, and Great Distances scenery corresponding thereto. Also perhaps you do not know the whimsical and poetic charm of a white-painted little Norwegian house in the skerries, sheltered by a rock and placed in the middle of a green patch surrounded by leafy trees and Norway Land of Contradictions,

Length of Coast Line Equals Half Circumference of Globe, While Farmer Harvests Corn in Latitude Where Siberian Soil Is Always Frozen

OSLO, Norway, (Special Correspondence) — Nature made Norway Here you may find the coast gray the land of contrasts. She made her lakes among the deepest and her valleys intersect the inland, and the valleys intersect the inland, and the valleys intersect the inland, and the mountains among the highest in Eu-

Nature made her the land of distance; no other European people except the Russians have such great distance.

Nature made her the land of distance; no other European people except the Russians have such great distance.

Nature made her the land of distance; no other European people except the Russians have such great distance. listances to cover as the less than 3,000,000 people living in Norway. The straight line from the extreme south to the extreme north of Norway covers more than half the distance from New York to San Francisco. To the extreme east Norway is on the same meridian as Constantinople, while her westernmost point the same line as Amsterdam

and Marseilles. Nature carved Norway out of one single giant stone, as it were, chis-seled out a multitude of narrow valleys and intersected her with deeprunning fiords. She covered onefifth of her surface with forest and much of it with lakes, and made twothirds of her surface unproductive. No wonder, then, that Norway is the most sparsely populated country in Europe, with only eight persons per

square kilometer. But nature was still not satisfied. She made Norway a contradiction to all established rules. She led the warm Atlantic current along her entire coast, which, all inlets included, equals half the circumference of the globe. And lo, the Norwegian farmer harvests his ripe corn to the 70th degree of latitude, while in this very latitude the Siberian soil is frozen all the year round. Just as far north as the northern point of desolate Labrador a rich artistic and cultural life blossoms in the Norwegian capi-

Fiords Always Ice-Free

Nature formed the bottom of the fjord in such a wonderful way that the deep-lying, cold waters of the sea outside could not enter it. There-fore, all Norway's fjords are ice-free summer and winter, in the north as well as in the south. And nature sunlight over northern Nordays. And in winter she flashed the aurora borealis across the snow covered fields.

You arrive one day in the Norwegian capital, Oslo, and you are in the heart of eastern Norway, with its harmoniously balanced landscape, with well-cultivated fields, coniferous for- industry of the Lofoten Islands OLD AND NEW FORMS ests, broad river; flowing along majestically and blue hills curving As the steamer plies on, past fan-gracefully against the horizon. a greater sense of genuine hospitalify than can be found in Austria
and in Vienna. Whether the travand in Vienna. Whether the traveler is touring the country on foot, the thoroughfares quiet, the mu-seums, palaces, national library, art galleries and theaters are worth by automobile, by boat or by train, he will inevitably be greeted by a smile and by a courteous response to inquiries. Peasant cottage, inn or joyment and study.

and other spots brings castles, scen-ery and historical associations Start With the Tyrol A visit to Austria properly starts with the Tyrol, of which Innsbruck is the capital. The Tyrol can be reached from Italy, by way of Bozen, Meran, and the Brenner Pass. Bozen and Meran, although geographically in South Tyrol are now a part of Italy by the terms of the peace treaties. The valley in which they lie is one of the most beautiful in Italy. The Tyrol can also be in Italy. The Tyrol can also be reached from Switzerland through Zurich and Buchs. This is the most usual way of approaching Innsbruck, probably because of the excellent train service direct from Paris. Best of all is to drop down lazily upon Innsbruck from the northern untains-down from Munich over

Famous Innsbruck Roof

Speaking of roofs, there is a famous one in Innsbruck, known as the Goldene Dachl. It is actually made of gilded copper and was constructed over a Gothic balcony in 1425 by order of Count Frederick of Tyrol. It was his somewhat ostentations way of correcting the rumor of his being the man "with the empty pockets." The arcades, the winding staircases in ancient houses, the statue recalling the union of the Tyrol, Andreas Hofer, who led the defense of his country against the Bavarians in 1809, castles on endircling hills, mountains to climb, valleys and villages to visit, peasants and customs and costumes with and customs and costumes with whom and with which to become familiar—such is the story of the Tyrol, which winds round and about Innsbruck.

Instead of one, in the Iberian Peninsula that are occupied by England, a fact of which the Foreign Office itself

Woving eastward in the direction of Yienna, the traveler comes to Salza burg. The city lies on both banks of the Salzach, "bounded by the abrupt eastle-hill and the Mönchsberg on the left bank, and by the Capuzinerberg on the right bank," as a guide book on the right bank," as a guide book on the right bank, and by the Capuzinerberg on the right bank. would inform the visitor. Salzburg, the province, was an ecclesiastical principality in south Germany. It is 1816. Salzburg, the town, is a musical center; Mozart was born there. It is also the place from which the grade and the habits of the commence a town of the lake disto commence a tour of the lake district. The Mond See, Atter See, St. Wolfgang and Traun See are the principal bodies of water, clear lakes lying in long folds of wooded alopes and checked after several miles by buttressed mountains. Sail-miles b ing is enjoyed, as are also other suminer sports. It is also a district of and there are no modern hotels, but only inns and hostelries of the most in the sports. Pleasure-Seekers in Germany Can Take Many Varied Trips

Northern Part Is Agricultural, Middle and West Industrial, and the South Picturesque-Berlin Is Center of Social and Political Life

BERLIN (Special Correspondence)

Tourists coming to Germany may rest assured that the German people will receive them with all due cour
duty of his host to inform the land-lord of his presence, who again must see that he is registered with the police.

Should the German visé expire be-

turesque. Berlin, as the capital of Germany and the center of the political and social life, taking a leading position in the world of art. always attract the tourist, whatever interests he may pursue.

Picturesque Rhine

If, after seeing Berlin, he wishes to indulge in beautiful country he should turn to the Rhine with its picturesque valleys and castles, to the sturdy Bavarian Alps, to the mountain pine-woods of the Black Forest or the Harz, to the picturesque hilly country of Thuringia or to the magnificent Lake Constance in view of the Swiss Alps. If he likes to roam about in quaint medieval towns with criss cross streets and houses blackened by age, he should visit Nuremberg and for the German vise is no longer re-Rothenburg and see the old parts of quired in the case of Americans Frankfort. If he favors picturesque traveling from the United States to towns with fine buildings in the style of the past centuries he should visit Dresden, Munich or Cologne; if he is atives of the shipping company with a loyer of magnificent cathedrals whom the holder has booked passage Cologne, Mayence, Frankfort, Munich, and who will take the necessary Ulm, Bamberg, Regensburg, Konstanz, Freiburg will please him. If he, however, is interested in modern industry, the Ruhr district, the in-dustrial region of middle Germany around Halle and the Upper Silesian factory towns should be his goal. In Eisenach in lovely Thuringia the Wartburg waits for him where Martin Luther first translated the Bible.

church, and Hamburg is one of the Munich, Innsbruck and Munich, largest ports of the world, with Vienna, Budapest and Munich, Zurthis advantage over the London port, ich; Berlin, Frankfort, Zurich; that it is more compact and can be Hamburg, Frankfort, Zurich; Hamseen in less than an hour.

Since the hotels in Germany are Hamburg, Copenhagen.

often overcrowded during the tour-ist season, it is advisable to order a sembles that of the first class in the room a couple of days beforehand, if train to which is added the price of such like, are easily procurable

In a good hotel a continental breakfast (which is by no means as RUMANIA FIELD OF ample as an English breakfast) costs about 2.50 marks (about 50 cents), lunch costs about six marks (\$1.50) and dinner about seven marks

Famous for Konditorel

Famous is the German Konditorei, a shop noted for its cakes, where light refreshments can be had. A German specialty is the so-called "Torte," a layer cake which is served with whipped cream. It should be mentioned here that it is not the custom to ask for bread and butter or toust in these Konditoreien. If such are wanted it is best to take one's afternoon refreshments in the lobby of one of the leading hotels which are no more expensive than a good Konditorei. Kell known, too, are the cafés with which every German town and city is well provided. They resemble Konditorelen only that there is usually a small but good orchestra. The cafe in which the Bohemians of Berlin meet is the Romanische Cafe at the back of the Kaiser Wilhelm Gedächtnis Kirche.

All-in-all, it may be said that in order to live in Berlin in a good hotel, and to take one's meals in a good restaurant and to visit a theater or go to a concert in the evening from about 25 to 30 marks or from six to about eight dollars daily are needed. Other cities and towns, especially in South Germany, are

cheaper.

The German visé permits the bearer to live in Germany until the date on which it expires. If he stays at a hotel or pension he need not trouble about registering with the police, but if he lives in a family longer than three days it will be the TRAVEL ONLY BY AIR

Betsy and Christopher Careful Columbus Weed the Garden

By RALPH BERGENGREN

topher Careful Columbus, as the at the other end of the row of rad-Funny Man called himself when he ishes." helped plant a garden. They had "That's the way to do it," said the planted rows of beets, radishes, turvegetables, and for some time after all, no matter how much you may these pleasant vegetables had been feel like it, till you get to the other planted nobody would have known end. 'Keep your eye on the weed,' they were there except for their as my great-grandfather used to say names, printed on pieces of paper to my grandfather, and my grand-that Christopher Careful Columbus father to my father, and so my father had fastened at the end of each row used to say to me.

with a sharp stick.

Now, some of the pleasant vegetables were beginning to come upbut a lot of lively green weeds that Beisy and Christopher Careful Columbus hadn't planted at all were coming up very much faster. That is one of the surprising things about one of the surprising things about a garden. Things you haven't planted come up faster, and more of them, than things you have planted, and Till all of them are out. then you have to spend a lot of your valuable time pulling up the things you haven't planted so that things you haven't planted will be And then the job is done."

And you will be surprised how quick The busy minutes run. You pick and pick and pick and then the job is done." the things you have planted will be able to grow. This, as everybody knows who has ever had a garden, is called weeding, and some people the weeds and picked steadily, and pleasant vegetables when they are ready to eat. But it has to be done

knees weeding. Betsy junior sat at the edge of the garden, leaning against the left leg of the wheel-

garden, so there you are,

like it if you had to pick out all these

Betsy junior said nothing, and of

there he was, looking down at her,

there he was, looking down at her, with his hands in his pockets.

"Good morning, M'am," said the Funny Man. "Did I hear you telling the young lady that you needed somebody to pick weeds?"

"Why, you're just the very man I wanted to see, Christopher Careful Columbus!" exclaimed Betsy. "Can you weed a garden?"

you weed a garden?"
"Can I weed a garden?" repeated
Christopher Careful Columbus. Why, you might send to Zanzibar, To Greenland, or Peru And never find a better man To pick a weed for you.

Why, some may think they pick a weed With much dexterity. But not another anywhere -Can pick a weed like me.

Why, I began when but a child Great talent to evince For picking weeds, and I've improved Each summer ever since.

"Will you pick weeds for me for a pin?" asked Betsy.

pin?" asked Betsy.

"Two pins an hour is what I charge, M'am," said the Funny Man.

"And they have to be bright, shiny pins."

"Very well, Christopher," said

"Very well, Christopher," said

planted with the help of Chris- "All right," said Betsy. "I'll start

lettuce, and other pleasant end of a row, and never look up at

This sounded like very good advice think it is much less interesting than watering with a hose or picking the that she would get to the middle of the row before Christopher Careful you are going to have a good Columbus got there, and then she arden, so there you are.

Betsy was down on her hands and interested in this idea that she kept right at work without saying a word, and the Funny Man didn't say a word either, but was so quiet that Betsy felt sure he was weeding as fast as barrow and smiling sweetly at Betsy because Betsy happened to be right he could and trying to get to the middle of the row before she did 'Perhaps you think, Betsy junior," And, of course, Betsy junior didn't said Betsy, "that weeding a garden say anything either, but leaned isn't hard work. I wonder how you'd against the leg of the wheelbarrow, and smiled and smiled.

Betsy junior said nothing, and of wonder now near sine was to course Betsy didn't expect her to.

"If Christopher Careful Columbus, but she kept her eyes on the weeds and was bere." continued Betsy after a moment, "I'd pay him a pin to pick these weeds."

Now perhaps Betsy knew that the Funny Man had just come round the funny Man had just come round the funny Man had just come round the source, and perhaps she didn't. But the plant on which the water always find my active mind is best prepared for weeding.

Then Betsy stopped and looked up the course Betsy didn't expect her to.

Christopher Careful Columbus, but she kept her eyes on the weeds and so did my grandfather used to do. And themselves all over Britain, and they are dropped in another place. So did my grandfather used to do. And themselves all over Britain, and they are dropped in another place. Asia, but over vast areas in North America, too.

The Little Black Cat

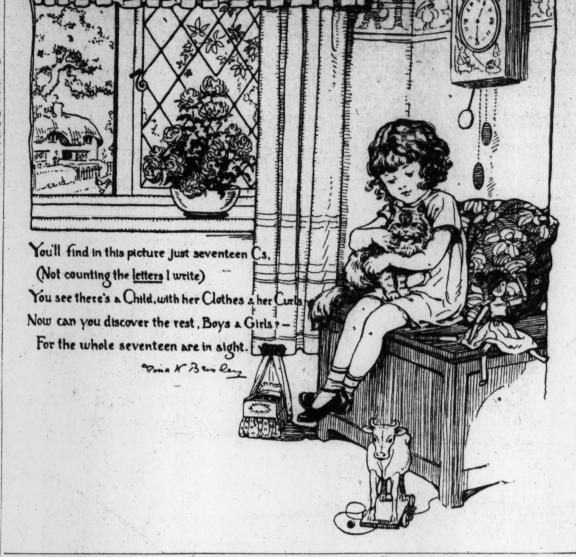

Written for The Christian Science Monitor.

Written for The Christian Science Monitor.

And there sat Christopher Careful Columbus in the wheelbarrow reading a book he had taken from his

pocket.
"Christopher Careful Columbus!" pher Careful Columbus. "Of course I'm reading."

Betsy. "I said 'weeding.' '

And then to weed begin, And that's the way each summer day I earn an honest pin. "I shan't pay you a pin," said Betsy. "I never heard of such a thing. said Betsy. "You're not weeding!"

'Oh yes, I'm reading," said Christopaid a pin for sitting in a garden and reading a book."

"Very well, M'am,' said Christopher didn't say 'reading,'" said Careful Columbus. "Then I shan't their carriers. Birds are probably the pay you a pin either. I never heard greatest travelers in the world, for "Oh, so you did, so you did," said of such a thing. The idea of anybody the Funny Man. Weeding, not reading. But they do sound very much garden."

Plants as World Travelers

After a time Betsy began to wonder how near she was to Christopher Careful Columbus, but alike, don't they? And I always most every warm country in the which they cling for a time to the haired Keeper who was standing wonder how near she was to read before I weed. That's the way world. They have not only spread animals' hair or fur. Then finally near, "but to this artist the marble with they cling for a time to the haired Keeper who was standing near, "but to this artist the marble they are dropped in another place, was not a useless stone, because he

for many miles. Later on, however, this float decays, and then the seed sinks to the mud at the bottom, and there takes root—perhaps in quite a different country from where it was born!

Journeys on Birds and Animals Then there are many plants which have chosen birds and animals as many of them journey over whole continents in their wonderful migra-

tory flights. Charles Darwin, the great English naturalist, proved long ago that immense quantities of plants get carried about in seed-form by the birds, TT MAY seem strange to you at wonderful thing a seed really is? as they fly from one place to another. first to hear plants spoken of as Hundreds of plants bear seeds so On one occasion he took a small pad travelers, yet really they are among the greatest travelers in the among the greatest travelers in the

John Martin's Child's Magazine Helps the Child to Constructive Thinking

The child thought is like a garden. It needs constant care and cultivation in order that weeds may not take root. We are frequently amazed at the observations that come from infant lips, showing a thought world of which we are quite ignorant. It is our task to see that only seeds of clean fun, loyalty, truth, honor and love are planted there for such seeds alone will bloom into lives of happiness.

John Martin's Book stands firmly for all those things that you wish to see exemplified in your child. It is not only "the book with a heart," but it is a magazine with an ideal.

To introduce it to you we offer Three Months for One Dollar

leave the trains at all for customs ment to the experience. It is impossible to describe half the beauty of this rushing river, especially beautithe afternoon. Here there are com- ful in the spring, when the trees on fortable hotels, with the usual system of restaurant meals paid for on tinged with green, and the low meadthe spot, leaving only the bedroom charge to figure in the bill. A good room can be had for about 4s. 6d. a day.

Much of Interest to See

There is plenty of interest in this the snow-covered peaks of the Carpeautiful city, and in its immediate pathians. neighborhood, to last a traveler for many weeks. For those who want go farther afield, very varied opportunities offer themselves.

In Bohemia are to be found many unspoiled towns, where we can imagine ourselves back in the Middle Ages, as we pass through the old fortified gateways, and beneath the walls of the frowning castles. One very attractive group of towns in the south includes Cesky Krumlov, picturesquely situated on a double Scurve of the river Vltava, and encir-cled by hills. The principal hotel stands right on the river, perched high above it on the steep rocks which form the bank-an old building, but with modern comforts.

Beautifully Graffitoed Houses Farther north there, is ancient Tabor, built by the Hussites about 1420, on a hill surrounded on three

sides by the River Lužnice. It still retains many of its early buildings, including some beautifully graffitoed houses in a corner of the square; surrounding country is de-varied and undulating, a Frenchman, and has spent the last and the surrounding country is dewith wide forests on the river banks. In the northeast of Bohemia there in all parts of the world.

is the district knows as the Bohemian paradise, where a smiling tralia because it is the only country region of meadows, woods and streams is intersected by very remarkable sandstone ridges, broken conditions of this long walk, and up into fantastie columns and figures. Jian and Turnov are two towns which form excellent centers ful. The conditions were that he was for visiting the paradise; the former, to leave Sydney, N. S. W., with 10s., with its arcaded square and Wald-ask for nothing but work, water, and stein Palace, is worth a visit for its own sake alone.

Hotels in the Heights

If mountain-climbing is the attraction, here also a varied choice awaits us. The High Tatra Mountains, in Slovakia, rise to a height of 9000 feet, and the way in which they mass themselves imposingly above the lower ground makes them appear even higher than they are. On their lower slopes there are comportable. lower slopes there are comfortable hotels, as much as 4500 feet above the sea, from which excursions can be made up the mountain valleys linely places is a hardened traveler. and to the summit of the highest peaks. Beautiful lakes, known locally "eyes of the sea," lie hidden parts of he world, and has inde-

hills, there are villages where the people still wear the old distinctive placed by slate and tile and stucco. The dress of the women is frequently The dress of the women is frequently gorgeous in color and very richly embroidered by hand; the men's clothes are also hand-embroidered, but they have less scope for brilliancy of color.

Excursions on the Vah In Slovakia, the whole valley of the River Vah is well worth following, in its rapid course southward to join

Protracted Period Necessary to Enjoy Wild Beauties of Protected Land

BERNE (Special Correspondence) -In the Swiss National Park, in Canton Grisons, a family of chamois, a most amusing sight. Throwing her- crease. self down in a sitting position at the top of the snowfield, she slid down, the kids skipping and tumbling

When she arrived at the bottom of the incline, up she sprang with leaps diffic research work in plant and aniand bounds, and again showed then mal life. The meteorological, geohow it was done. Once more they graphical, botanical and zoological tumbled after her, and up and down. up and down, 10 times, 20 times she systematically explored, and regular went, until at last the young ones knew how to do it. Then they all slid merrily down together on their hind quarters, until suddenly the whole pack shot off toward the rocks and disappeared.

The reason for their flight was soon seen. High up in the blue sky above the Piz Terza a golden eagle (Steinadler) was swooping in mighty circles. Very soon a second king of the air appeared, and the sudden disappearance of the chamois was ex-

Park Started in 1909

The Swiss National Park had its genesis in 1909 when the Swiss leased the wild Val Cluoza near over mountain and valley and southward to the Italian border.

The league was then faced with its inability single-handed to bear the increased cost, so it appealed to the Swiss Confederation, and just before the outbreak of the war an act of Parliament was passed decreeing that the National Park should be leased by the Confederation for 99

Protection of Nature

In olden times the Swiss had laws ample, Zurich enacted a law in 1335 for the protection of birds; in 1339 Schwyz had a forest protected, and 'in 1448 Glarus caused some territory in the Kärpfstock to be protected by the state, and up to the present time hunting is forbidden there. One Canton after the other followed suit with its protection laws, especially after the introduction of firearms in the sixteenth century. The first animal to be protected by law was the ibex

When the Confederation took over the lease, the state not only stipulated that the National Park should be protected and allowed to return o its original wild condition, but that it should serve as a ground for scienconditions of the park are therefore reports are made to the state.

nineteenth century.

Days Required to See All

Although the Swiss National Park is small, compared to the immense stretches of protected land in North America, those who wish to travel through it must allow themselves at least four or five days to do so. This time is necessary unless one rushes through without seeing or enjoying the wonderful and inexhaustible beauties of nature. Besides, the country is wild, rough, and not easily ac-

With the exception of the beautiful road of the Ofenpass, which is now traversed by an autobus that carries League for the Protection of Nature Italy, there are, so to speak, no roads came into existence, and in that year at all. A few bridle paths climb the steep, rugged mountain sides and Zernez in the lower Engadine. This protected territory of about 20 square woods, or zigzag through alpine kilometers grew during the next two fields, strewn with fairylike flowers, or three years to a vast area of 140 to plunge down the further side of square kilometers, stretching on the mountain into deep valleys and is perhaps the most striking out-either side of the ancient Ofenpass ravines, where wild torrents sing ward sign of the League's work, but their ancient songs. Then they mount again over sunny

pastures and desolate rock-strewn slopes, up to the line of snow and Such tours involve hard work, but the wonderful, romantic mountala scenery, the flowers, the butter-flies, the large animals of all kindsabove all, the intense solitude—re-pays the toil.

The traveler who wanders across the Ofenpass and climbs over the mountains and descends into the Scarl-Tal, may see there the largest and most beautiful forest of Siberian stone-pine in Switzerland. This "Guad da Tamangur," with its an-cient, fantastically formed trees, is untouched by civilization. For the preservation of this alone there is reason for gratitud to the League for the Protection of Nature.

A PROPHECY REALISED A PROPHECY REALISED

JOHN RUBKIN wrote 90 years ago: "I am more thankful every year of added life, that I was born in London, near enough to Genera for me to reach it easily." And again:
"And this bird's neat of a place to be the centre of religious and social thought and physical beauty to all living Europe, that is, to thinking and designing Europe."

This prophecy of the great English writer has been more than realised. Genera having become the seat of the League of Nations and International Labour Office, has developed into the political and social centre of the world.

Thirty-one institutions, organisations and international works comprising political, social, religious, humanitarian and scholastic aims, have here established their

comprising political, social, religious, hum aims, have here established their headquarters.

Nowhere clae can one so well feel the pulse of the universe. Here is the true centre for the student of international affairs. Genera is already "the ideal observatory from which to study other nationa," spoken of by Mr. David Jayne Hill, former United States Ambassador to Berlin.

Therefore it was natural that the University of Geneva should have created, in 1922, vacation courses for the study of international questions. These courses, which are attracting more students over year, have decided the International Federation of Students to hold its annual congress and Summer School at Geneva in conjunction with the University and the students took away with them the same impression as Mr. E. D. Rockwell, professor at Columbia University, New York, who wrote in 1923: "The International atmosphere which you breathe here is inspiring, broadening, developing and for most of us Americans a revelation. It gives us a wider outlook, a different and nobler point of yiew."

us Americans a revension.

a wider outlook, a different and nobler
point of yiew. GENEVA. AS UNIVERSITY CENTRE.

The visitor to Geneva is at once struck by the extraordinary
intellectual and artistic activity everywhere to be felt. There is a
succession of literary, actentific, scholastic, religious and political
conferences and good opera and theatres.

Geneva has secondary schools, a college, school of Fine Arts,
of Industry, of Watchunking, a renowned "Conservatoire" of
Music and its UNIVERSITY with its faculties of Science, Letters,
Law, Economic and Social Science, Medicine and Protestant
Theology.

Music and its Law, Reconomic and Social Science, Recording Law, Reconomic and Social Science, Recording Theology Undergraduates and Oraduates from the American and English Universities have the opportunity to learn French rapidly, while continuing their studies, specialising in any branch above mentioned.

the science of education at the Institute Jean-Jacques ROUSSEAU, have excellent laboratories and many possess very fine collections, enabling a thorough study of the subject.

Students in law and economic and social science find it a great advantage to have ready access to the Secretariat of the League of Nations and the International Labour Office. And students in theology find in Geneva the most complete set of documents on Calvin and his movement.

The Secretary of the University will be glad to send free of charge, a detailed programme on application.

GENEVA SUMMER VACATION COURSES

The following courses and congresses will be held at Geneva in July. Angust and September. Programmes will be sent on application.

Beauty Spots Plentiful in South Germany

Goethe's Country Rich in Architecture, Parks and Picturesque Homes

BERLIN (Special Correspondence) -Traveling in Germany is no more the "great adventure" it used to be considered directly after the war and even as late as 1923. The foreigner who comes to Germany today will hardly notice the subtle differences between the present conditions and those before the war. The river Main divides Germany into a northern and a southern half, and Frank-fort-on-the-Main, the ancient Free Town where the German emperors used to be crowned and which for a short period was the seat of the German Parliament, is the entrancegate to the south. Frankfort, which still possesses a medieval nucleus in the neighborhood of its Gothic Cathedral of dark red sandstone, which gives the town its characteristic silhouette, and of the "Roemer," the ancient Town Hall full of mem ories of bygone days, is at the same time the most elegant of German

Its shops and stores are full of enticing things, its parks charming and well kept, its museums and libraries worth a good many visits. but not least, every visitor to Frankfort will enjoy going over the house where Goethe was born and which has been preserved in exactly the same condition it was in when Goethe was a child and which he describes so minutely in his mem-

Venerable University

From Frankfort it is but an hour and a half's railway journey to Heidelberg, the seat of the venerable university. The lovely old town on the banks of the Neckar is loveliest when spring weaves its garments of white and pink flowers over hills and gardens. Goethe, after a visit to Heidelberg, wrote in his diary, "The town, its situation and its surroundings are of an ideal beauty which will only be completely understood by those who are acquainted with the principle of landscape-painting and who know what thinking artists have learnt from nature and what they

Heidelberg is not far from Baden, the watering-place of international fame, situated in one of the northern valleys of the Black Forest.

Ulm is the Wallensee. for the Lake of Constance and for tain towering above the village, Augsburg and Munich.

Baroque Architecture

The town of Würzburg is a wonderful place. One ought to see it first from the Marienberg, which is crowned by an ancient fort from where one can overlook the river, the old bridge and behind them the network of ancient streets and yards. The two Romanesque spires of the cathedral form a striking contrast to

the baroque buildings by the eight-eenth-century architect, Balthasar Neumann, who turned Würzburg into one of the finest specimens of Ger man baroque architecture. The streets abound in genuine rococo dvelling-houses, but the crowning beauty was given to the incompara-ble castle which has rightly been called the most magnificent baroque building in Germany. The immense entrance hall, with the celebrated celling painted by the Italian painter,

artistic and residential Brussels is NEW ENTRANCES proud of its colossal "Palace of Jus-tice," the oddest and yet most successful synthesis of many architec-tural styles. The heart of Brussels includes a jewel: La Grande Place, surrounded by ancient structures of rare designs, all richly gilt, making it the most ornate public square in

It would be futile to attempt to describe the museums in Brussels; their wealth is overwhelming; but among the Flemish primitive paintings in the Musée Ancien, there is a "Fieta" by Roger de la Pasture which no one who saw it will ever forget.

Guidebooks like to call Bruges the "Venice of the North," because of Flanders, though, has been mainly its canals and bridges. How unfair! Has not Bruges a northern charm so urique that even Venice might envy Venice has not those quaint exhibition station entrance, are begables and windows nor these vistas of old, flower-embowered, gardens. Bruges, and Bruges alone, is the town guildsmen, and with many an august person of Hanseatic days.

Crusaders Leave Bruges

Eruges has a peaceful béguinage where old women are at work with their lace pillows and bobbins before the doors of their homes. In Bruges is the church where the Knights of is required; prices are pleasingly the Golden Fleece laid their swords used. Transportation Is Primitive and Slow

LISBON (Special Correspondence)

Without doubt Portugal is a country well worthy of being visited.

Traveless will carry an airplane in which, with his pilot. H. Travelers who merely visit Lisbon Humphreys, he will fly from Spitz-and places within easy reach of the bergen. Apart from the possibility of capital, have no idea of the points of capital, have no idea of the points of to take about six months. The Lady interest existing throughout the provinces, not only for their natural beauties but also for their historical associations. Among these we might mention that "monument in lacework" as the poet has called it—the Monastery of Batalha, recalling past glories, and a fitting shrine for the Unknown Soldier who there reposes; ussaco with its wonderful six-mile forest of century-old trees; the ruined Temple of Diana at Evora; or river-girt university town of Colmbra, picturesquely perched on the summit of a hill.

Farther south the Algarve with its Jeagues of almond and pomegranate groves—a dream of pink or scarlet blossoms against the brilliant blue of the Atlantic, deserves a lengthy visit, as in the north the vine-clad terraces

Motor Traffic Limited

Portugal unfortunately is deficient connect Lisbon with Oporto and the frontier in the direction of Madrid and Paris are well equipped, but in the bad state of the highroads motor traffic is limited. Provincial districts are served by diligences which crawl up the many hills.

In the steeper parts the traveler must alight, and sometimes even lend a hand to help the exhausted mules drag the vehicle to the top! Fresh relays of mules await the diligence at inns that might be taken from some old picture—inns that civilizations have not yet touched, but whose game, poultry, dairy produce and fruit might do honor to the tables of the best hotels of Boston or New York.

No Napery, But Prices Moderate

Neither table cloth nor napkins are to be had, but the price is moderate in the extreme. The meal over, the traveler once more packs himself into the diligence. This is a delicate operation, and is thus described by a amous Portuguese writer: "First layer of people—the fat and heavy for preference. On top of these a layer of luggage, then another layer of light people and children. Successive layers of luggage and people until the diligence is full. On the roof the heavier luggage is piled, crowned by another layer of travelers.

Motor travel is scarcely more rapid. Owing to the bad state of the roads only a very slow pace may be maintained, and punctures and other mishaps are of frequent occurrence.

The provincial railway carriage is always overcrowded, as many persons as possible squeezing in despite regulations, all bearing baskets containing live chickens, eggs and fruit, which the cautious peasant will not allow out of his sight for one mo-

CLOPTON BRIDGE TO BE PRESERVED

a learned book does.

Special from Monitor Bureau lovers of the beautiful at Stratfordon-Avon will be glad to hear that probably the ancient Clopton Bridge will be preserved, as it was originally built. At some time in its history an unsightly iron footway was added to the narrow old bridge, and for mere convenience has doubtless been useful, but very ugly. This iron structure is to be removed and the bridge itself reconstructed in its old narrow form, with a narrow parapet on each side. This bridge will be kept exclusively for foot traffic, so that there will no longer be any danger of its suffering from modern vehicular transport.

By the side of the old bridge there is to be erected a general traffic bridge, consisting of a carriageway and another footpath. Carried out as lightly as possible in reinforced concrete and with its piers opposite every second or third pier of the old bridge, as little of the latter as possible will be masked. The details of tupnels in the United States, South the work are now being considered America, and Africa has received and the plan will probably be

Architectural Beauties Seen in the White City of Pallas

'Athens Is the Home of Classic Art Accompanied by Rural Scenery

home of classic art and the latest

or the White City of Pallas, as it is usually called, is really representa-tive not only of the best literary, institutional and business efforts in the whole country, but—what is the most wonderful—of its general physical and theaters in the summer-time, a features, urban and rural, as well. rapture on the Phaleric quay under more than four-mile area a moonlit sky, or in the occupied by the city, one may come pine groves, or in the Zappeion garacross quarters reminding one of the dens, commanding one of the most town, as well as parts typical of the cursion to the Acropolis or to most graphic rural scenery.

City Reached from Pirzeus

Athens is reached from Piræus, its famous seaport, five miles away, either by an electric double-lined railway, which in the last stage of the journey to Athens passes through tunnel, or by motor. Piræus, which at the beginning of the nineteenth century was a small fishing village with a few hundred inhabitants, has, with the first 100 years of the country's national independence, risen to the position of the third biggest port in the Mediterranean, coming next to Marseilles and Genoa, and is the seat of Greek industrial activity.

Big business firms in Athens have their factories and industrial plants established in Piræus and in the beautiful country lying between the port and the capital. It is expected that in the long run the two towns will be connected by buildings filling

Every Season Salubrious

the city is in its glories in with the City of Pallas. spring-time

The first blossoms of the almond BAGGAGE RULES days of February, and throughout March and April the atmosphere is pregnant with the aroma of the lemon and orange trees. With the advent of hot weather in the three summer months, the two Phalera, the charming watering-places built on the two arms of the bay which in ancient times was the first harbor of Athens, and Kephissia, the cool resort on the northeast, with magnificent villas of distinctive architectural designs, become the fash-

ionable center of Athenian society. communications of modern Athens have increased enormously of late. Tramways, omnibuses and motor cars reach practically every of colossal trunks for them, any-

ATHENS (Special Correspondence) | mania for politics and political dis-For all those touring in southeast-ern Europe, a visit to Greece, the home of classic art and the latest convert to that democratic regime, of which ancient Athens was the cradle, must be of absorbing and thrilling interest. If in ancient times Athens was considered to be the eye of Greece, the same holds good today.

The beautiful, marble-built capital, the White City of Pallas as it is sale will find as a more alluring topic

Athenians Are Late Abed

The Athenian, as a rule, goes to bed in the small hours of the morning. The open-air cafes or cinemas and theaters in the summer-time, a best architectural designs of a great glorious views in the world; an ex-Lykabettus or to some of the fas-cinating suburbs of the town; on the other hand the theaters and other places of amusement, in winter, all these appeal to him more strongly than he could probably resist

The modern Greek does not believe in silence. Whether in a cafe or a restaurant or on walks, even in church, he will let others participate in his inner thoughts or feelings. The street cries are quite a feature From early dawn the milkman, who with his cart makes his daily round through the highways and by-lanes of the town, and the newsboys, and later on, the grapes-seller, who will soon be surrounded by maids from all directions waiting to be served hand luggage. It should be fitted from one scale with the daily ration with a fairly deep tray capable of of the delicious fruit, and all the other hawkers and tradesmen and be light, and large enough to conknife-grinders will parade with their particular cries.

LAKE DISTRICT OF ENGLAND A PARADISE FOR TOURISTS

Lakes Windermere and Ullswater. With Heights of Scawfell, Helvellyn, and Skiddaw, Offer Many Tours of Charm and Interest

LONDON—Visitors approach the lakes from the north by Keswick, and from the south by the little branch railway line that runs from Oxenholme past Kendal to Windermere. This station lies above the very rough path across Stye Head largest of the lekes, and the little rown merges into Bowness, on the leady of the water. The road between and Great Gable to Rosthwaite and edge of the water. The road between Windermere and Keswick passes, irst, Ambleside—an excellent center for expeditions to Ullswater, Con-Iston, the Langdales, etc. Then little Rydal Water, one of the loveliest of the lakes, with its rocky and wooded islands, and Grasmere, where, at Dove Cottage, the poet Wordsworth spent some of his most fruitful

From Grasmere, the Keswick road winds over Dunmail Raise, a great scooped out gap in the hills to the hills that enfold them, lie, roughly speaking, north and south. The hills are smooth on their western slopes and rugged on the east. Many valthe geological center of the district, the group of Scawfell, Scawfell Pike Gable, and Glaramara. Helvellyn church.

(3118 feet), some distance to the northeast, stands between Ullswater crowds and Thirlmere and is most impressive when seen from the Ullswater and Patterdale side. Skiddaw (3054 feet) stands alone north of Keswick.

A Walking Country It is a heautiful countryside but is all on too small a scale to be fully enjoyed by means of motor trips alone. One sees too much that way and misses the charm of each dale's individuality. The old horse coaches and "sharries" have not quite dis appeared. Or one may cycle, and feel free to stop and go up attractive by-ways. But to know the lakes, there is no real substitute for walking.

Strong boots will be necessary; a rucksack is a convenience, and an inch-to-mile contour map. It will be well, too, to take along a good water-proof of some kind. Certainly one sees the country in its greatest beauty when the sun comes out suddenly after a shower and the green of the valleys is brilliant and color everywhere is wet and vivid. Everyof running water, and one wet night may produce a dozen impromptu streams and waterfalls in half a mile

that is noticeable many miles away

Heather always seems patchy and local in its habits. Lingmoor abounds with it and there is hardly any more tiny circular bit of water, is bordered with bog myrtle, a delicious scented gray-green shrub, common here and in Scotland. Here and there scattered little white farms shelter under the hillsides. There are some particlarly pretty ones about the Lang-

Leaving these valleys one may climb some of the big fellows, Bowfell or Scawfell Pike. On a clear day the Solway and Scotland, and possibly the Isle of Man can be seen. and to the east the rolling hills dwindling to the Yorkshire moors. Farther, on, steeple and pillar look down upon that most lonely valley of Ennerdale, and below Scawfell lie Eskdale and Wastdale.

Pools and Waterfalls

Eskdale is winding and wooded. There are fine pools and waterfalls to be discovered by following up the main stream. Though Eskdale has few houses, it somehow seems to have a habitable and welcoming aspect, while Wastdale always seems bleak and bare and somber-looking.

Borrowdale, wooded, rugged, and heathery, with grand, bold outlines and a swift, clear river running into Derwentwater, may also be easily reached from Keswick. And from mere and Crummock Water, across Honister Pass, or walk up to the little tarn and hamlet of Watendlath hidden in a fold of the hillside above Lodore Falls.

July and especially August are the most crowded and least beautiful scooped out gap in the hills to the north, and passes Helvellyn on the right, and the long picturesque lake one can only come then, they have compensations. The last Saturday in the day of the Grasmere July is the day of the Grasmere Rushbearing. This children's procession is a picturesque relic of the days when unpaved floors were leys radiate from what seems to be of these in the church was an annual festival. Children of all ages still bring their "bearings," with wild and (3210 feet above the sea, the highest garden flowers adorning the rushes, point in England), Bowfell, Great and leave them in the old raftered

Toward the end of August great crowds gather to enjoy the Grasmere sports. There is much wrestling, and the fell race, to the top of Buttar Crags and back, is peculiar to the district. The sheep dog trials are held at Rydal, the day before the Grasmere sports, and at different dates at Patterdale, Troutbeck, and elsewhere. Any one of these trials is

Master Poet's Country Is Best Explored on Foot-Stratford-on-Avon Is Still Unspoiled in Spite of the "Business" Element

Special from Monitor Bureau

Shakespeare country is an education in inspiration, the inspiration which gave Shakespeare many of his most morial, comprising library and read-precious scenes and many of his most ing room, picture gallery and theater delightful characters.

The Forest of Arden

Stratford-on-Avon is, or was, in the Forest of Arden, and one need not look farther afield for the origin of much of "As You Like it," or beyond the neighboring villages for the originals of Nick Bottom, Christopher Sly, or other engaging creatures. They are Warwickshire folk to the marrow-bone, and speak and act

The Shakespeare country can be garden planted with flowers meneasily covered by motor, bicycle, or afoot, but afoot is by far the best manner, if one would seek out all its hidden beauties and points of interest. Stratford-on-Avon, of course, claims first attention, as sweet a country town as can be found be-tween the Tweed and the English Channel. In spite of the "business" that is inevitably associated with the birthplace, and of the annual festival which must be "made to pay," the town is still unspoiled, and it is still easy to imagine the poet as child, or youth, or in the prime of manhood, walking its narrow, busy streets, as he did in life. His "atmosphere, to speak, is around us as we go.

Eminent Men's Signatures

The birthplace is, perhaps, more prim than it was in his day, and maybe we could well spare some of the exhibits, especially part of the furniture. But it is sanctified forever by the "best bedroom" where, if anywhere in the building, the poet was born, and by the living room in which John Shakespeare probably received the earliest congratulations on the advent of his son. The walls and window panes of the birthroom are smothered with autographs. The practice of scribbling these is foroidden now, but the severest critic of that practice would not dare suggest the removal of the names of Scott, Carlyle, Browning, Byron and other amous men who have paid tribute to the greater genius.

If one would follow Shakespeare through the years of his Stratford life, one would next picture him "creeping like snail unwillingly to where he imbibed his little Latin and less Greek. It is the lashion to decry the sum of the poet's
learning, but every turn of modern
research points to the fact that he

of Shakespeare Land is supreme. One can enjoy the beauties of the Lake District without knowing a line of Wordsworth, or of Kent without having read a line of Dickens. But that broad and prosperous Midland plain, which nurtured Shakespeare in his youth, and to which he returned, a wealthy playwright, in the years of his leisure, is unique, in that the environment is almost indistinguishable from the man.

Buckle, the historian, who laid so much stress on the influence of river, mountain and flood on human character, might have drawn another lesson from Shakespeare Land and its contribution to the calm philosophy and cheery outlook on life of the Master Poet. To walk through the Shakespeare country is an education in transpiration, the inspiration which

Anne Hathaway's Cottage Thence to the Shakespeare Me--the hub of the annual celebrations But time is passing, and we have to follow in Shakespeare's footsteps along the path leading to Shottery where Anne Hathaway's cottage is still standing. OFFICIAL GUIDE (postage 3d.) from Pleasure Grounds & Enter-tainment Manager, Paignton.

Ireland this year! "IRELAND," said Michael Collins, proudly, to the heads of the British Government in Downing Street, "Ireland is no colony. Ireland is a mother country."
To what has Ireland been a mother? To

Europe certainly, in the seventh and eighth centuries; to all the world in a sense; and not least to America. world in a sense; and not least to America.

When the great liner on which you are travelling to Europe is passing Cape Clear and your eyes vaguely rest on the coast behind it, you are looking at a little place called Baltimore. It is the place from which George Calvett, Lord Baltimore, who, chiefly with Irish immigrants, founded the colony of Maryland, took his title, passing it on to another and greater Baltimore.

Eight of the signers of the Declaration of Independence were Irishbarn or through of Irish stock. Sulliving who struck the first blow.

Eight of the signers of the Declaration of Independence were trish-born or sprung of Irish stock. Sullivan, who struck the first blow in the War of the Revolution, was the son of a Kerry man; the O'Briens, who won the first fight on sea at Machias, were from Cork. Barry, the first commodore of the American Navy, was a Wexford man. Montgomery, who fell at Quebec, and whose monument is in St. Paul's, Broadway, New York, was a Donegal man. Not a county in Ireland but has given a great son and a great name to America. Come and study American history on Irish soil. Between England and Ireland the London Midland and Scottish Railway have six different routes.

Ladies' Hairdressing Expert Posticheurs

Experts for Shingling

We are specialists in the art and craft of Marcel Waving, Permanent Waving, and Manicure.

All these important Sections are staffed by qualified Operators. The Saloons are perfectly equipped, and the most approved up-to-date methods installed. Our Specialist is always at the service of those desiring advice on shingling. Ladies are invited to visit our Hairdressing Department, where personal attention and satisfaction are assured.

Special attention is also given to Children's Hair.

This Department also carries a unique and comprehensive range of foreign and English toilet requisites.
